Painting walls

# Made by us.

Reliable quality for you and your customers – we ensure this with our own production facilities and logistics centres.

## Production facilities in Europe and Asia

- Fast delivery times
- Reliable delivery
- Highest security of supply
- Painting tools specialist for over 125 years
- Largest European paint roller and brush production
- State-of-the-art production processes
- Strict quality controls
- Product development in collaboration with professional painters and the paint industry

# Sustainably designed and made.

Thinking and acting sustainably – that's what matters and that's our principle. After all, sustainability is firmly fixed as one of our corporate values. We use our resources carefully and pay attention to high social standards for both our suppliers and ourselves. We take our social responsibility seriously in everything we do.

- **Environmentally friendly product development:**  
recycled raw materials, reduced material use, long-lasting products
- **Sustainable material sourcing:**  
FSC®-certified woods and plastic parts made from recycled materials or regranulate
- **Energy-saving production technology:**  
through efficient robotics and energy recovery
- **Intelligent product packaging:**  
little material, a lot of information

Das Zeichen für  
verantwortungsvolle  
Waldwirtschaft

You can recognise our FSC®-certified products by this label.

**E** COLOR<sup>®</sup>

# At a glance.

Icons and illustrations make it easy for your customers and employees – one glance shows what the product can do.

- **Substrate quality:**  
smooth, rough or coarse – substrate icons indicate the right tool
- **Unique product benefits:**  
Xpert icons represent specific product properties
- **Quick price orientation:**  
four stars in silver for products in the medium quality and price segment, five stars in gold for the highest quality standards

**Smooth wall**

**Rough surface**

**Coarse plaster**

### Smooth, rough or coarse

The quality of the substrate plays a decisive role in the selection of the ideal tool. With our substrate icons, we make it easy for the end user to find the right product.

**Interior Exterior**

**Interior and exterior**

(Here, e.g. 45 days)

**Can be removed without leaving residue**

### Interior or exterior

End consumers want to see at a glance where and for how long they can use the product. The icons for the area of application and duration of application ensure this.

**XpertErgo**

... stands for perfect handling.

**XpertFinish**

... stands for perfect work results.

**XpertSpeed**

... stands for high working speed.

**XpertPlanet**

... stands for sustainable products.

### Xpert icons

Ergonomically optimised handling, perfect surface finish, fast work, sustainable product – our “Xpert icons” allow the end user to immediately recognise what distinguishes the respective product.

### Better-Best icons

Our product range is consistently sorted according to product quality in all areas. At the top is the highest quality and price range (**HPP**), below is the middle (**MPP**) and at the bottom is the entry-level segment (**OPP**).

#### Four-star product in silver

stands for products in the medium quality and price range.

#### Five-star product in gold

shows your customers: here you will find products for the highest standards.

### XpertTIPS

### XpertTIPS

COLOR EXPERT passes on its expertise in professional painting tools to private users – also online: There are QR codes at the POS and on the products that lead you and your customers to valuable XpertTIPS from COLOR EXPERT. Helpful application tips that make work easier and improve results.

# The module Covering

## Everything in one place

Whether it's to protect against paint splashes for a short time or intense mechanical stress over the long term – so that end customers can be sure of choosing the right covering material, they can find all covering products and related information in one place.

## Accurate product description

Choosing the right thickness and dimensions of the covering materials saves time and effort. The shelf panels provide quick and clear information about this.

## Clearly structured. For a quick decision

Foils, fleeces, paper – the clearly structured presentation of the different covering materials makes the purchase decision for end consumers simple.

## What to choose

The optimal covering material for every task: The vertical divider provides information on the application for which the cover films, painter's tarpaulins and construction tarpaulins are suitable.

# The module Masking and fixing

## One module for each work step

One module for fleeces and foils, one module for masking tapes. The headers provide the best guidance.

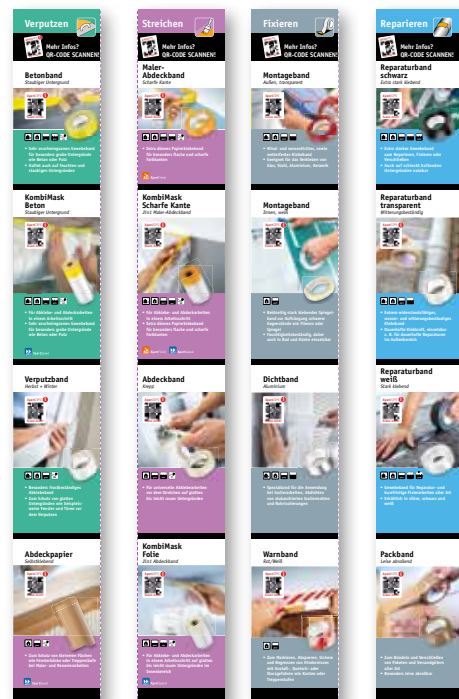

## Immediately in the right segment

The panels on the shelf ensure horizontal orientation and separate the diverse range of masking products into the different product areas.

## Quickly informed, confident decisions

On which substrate? Inside or outside? For days or weeks? With our guidance system on the vertical divider, your customer can quickly and easily find out which masking product is best suited for the planned application.

## Contents

Plastering	26
Painting	30
Fixing	38
Repair	44

## Plastering

### Robust and tear-resistant

When plastering, adhesive tapes generally have to withstand high mechanical loads whenever the tape comes into contact with the coarse-grained plaster or the trowel blade.

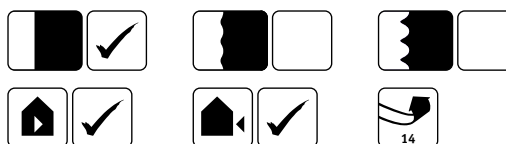

### Also for difficult substrates

Even on coarse and sandy façades, the highly adhesive, flexible and supple fabric tapes adhere without any problems.

### Façade tape, smooth plaster

- For flat, straight plaster edges
- Robust and easy to tear off
- Perfect for insulated façade

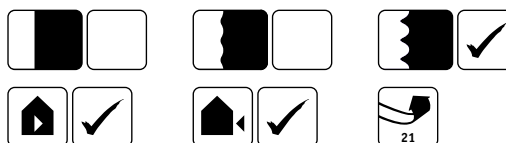

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96153099	48 mm	25 m	blue	acrylic	6	4 013307 783640

### Façade tape, coarse plaster

- For masking on rough façades
- High tack adhesive
- Extremely high mechanical resilience

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96225099	50 mm	25 m	light blue	natural rubber	4	4 013307 783657

## 2in1: Masking and covering in one work step

# KombiMask

### Fast and secure

The practical KombiMasks consist of high-quality adhesive tape in combination with cover sheeting or masking paper. The adhesive tape is applied, then the foil is unfolded and fixed – done. This makes covering and masking super-fast in just one work step.

### Tear-resistant cover sheeting

The robust cover sheeting reliably protects the substrate from paint, dust and dirt. It is simple to unfold outwards and automatically hugs the surface to be protected due to its static charge.

### Various sizes

Different standard sizes are ideal for covering, for example, plinths and windows, doors and entire wall surfaces.

High-quality adhesive tape for various applications

Easy to use

Statically charged film

## KombiMask Façade – Coarse plaster

- For covering and masking work on coarse façades
- High tack adhesive
- Extremely high mechanical resilience

Item no.	Width	Length	Colour	Adhesive type	Core length	PU	EAN
96745599	55 cm	20 m	light blue	natural rubber	10 cm	10	4 013307 745136
96742799	270 cm	16 m	light blue	natural rubber	20 cm	5	4 013307 783664

## Concrete tape Dusty surface

- For masking on poorly adhesive, sandy areas
- Very flexible
- Suitable for use with high-pressure cleaners

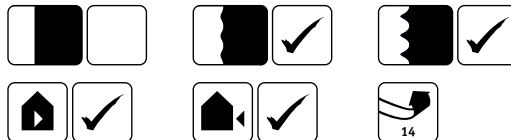

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96184499	44 mm	50 m	yellow	natural rubber	4	4 013307 745082

## KombiMask Concrete – Dusty substrate

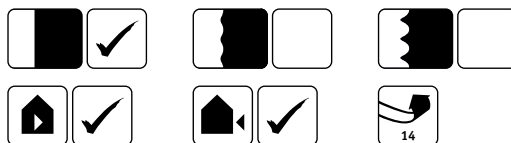

- For covering and masking work on poorly adhesive, sandy areas
- Very flexible
- Suitable for use with high-pressure cleaners

Item no.	Width	Length	Colour	Adhesive type	Core length	PU	EAN
96735599	55 cm	16 m	yellow	natural rubber	20 cm	5	4 013307 783671

## Plastering tape Easy tear

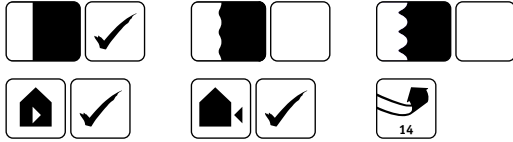

- For masking off window frames and sills
- Cross-grooved and easy to tear
- High mechanical resilience

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96145099	50 mm	33 m	white	natural rubber	24	4 013307 745068

## Plastering tape Smooth edge

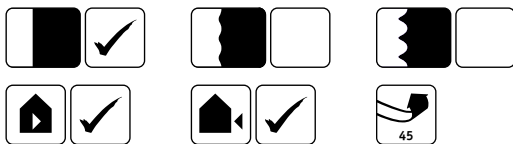

- For masking off window frames and sills
- Signal colour for good visibility after plaster application
- High mechanical resilience

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96115199	50 mm	33 m	orange	natural rubber	6	4 013307 745044

## Plastering tape Autumn + Winter

- For masking off window frames and sills at low temperatures from 5°C
- Can also be used on aluminium, galvanised surfaces and PVC

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96125099	50 mm	33 m	white	acrylic	6	4 013307 783695

## Paint

### First-class colour delineation

Painter's tapes with extra-thin special paper ensure super-flat, sharp colour edges without trailing.

### Also for painting and glazing work

The tapes can be used for painting work with paints, varnishes and glazes and are therefore versatile.

## Painter's masking tape Extremely UV-resistant

- Weather-resistant painter's masking tape for long-term masking outdoors
- Can also be used on slightly damp surfaces

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96072699	25 mm	50 m	red	acrylic	10	4 013307 810735

## Painter's masking tapes – the professional solution for (almost) every case

Masking work is often time-consuming and is perceived as a tedious chore before the actual painting. Nevertheless, careful preparation and choosing a high-quality masking tape will pay off in the end.

### High-quality components

High-quality Japanese rice paper (also known as washi paper) is particularly thin yet tear-resistant – making it perfect for achieving super-sharp, flat edges when painting. Thanks to the UV-resistant acrylate adhesive, the painter's masking tapes are ideal for outdoor use.

### Red – Extremely UV resistant

The red painter's masking tape is designed for really large projects and continuous use. Can also be used on slightly moist surfaces.

### Gold – For super-flat, sharp edges

The all-rounder for high-quality colour demarcation when painting, transparent glazing and varnishing indoors and outdoors. For razor-sharp paint edges without paint bleed.

### Purple – Gentle and ideal for wallpaper

The specialist for particularly sensitive substrates such as wallpaper and especially woodchip wallpaper. Easy to remove without damaging the substrate.

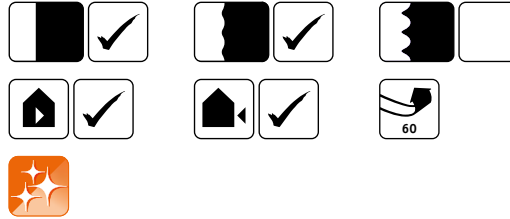

## Painter's masking tape sharp edge

- For high-quality masking during painting and varnishing work
- Special paper for super-flat, sharp paint edges without paint bleed

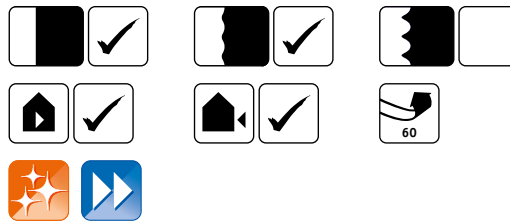

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96241999	18 mm	50 m	gold-yellow	acrylic	12	4 013307 788461

## Painter's wallpaper masking tape

- For high-quality masking on sensitive substrates such as woodchip
- Special paper for super-flat, sharp paint edges without paint bleed

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96093199	30 mm	50 m	purple	acrylic	8	4 013307 810414
96093999	38 mm	50 m	purple	acrylic	12	4 013307 810971

# Masking off correctly

Masking tape that falls off by itself, residues on the substrate or unclean paint edges – these damage patterns are unfortunately all too familiar. However, many of these problems can be avoided by following some basic rules:

## Choosing the right masking tape

It is important that the tape fits the specific application situation. Consider the condition of the substrate and the application area (indoor or outdoor) on which the tape is to be applied and compare this with the suitability of the masking tape.

## Preparing the substrate

The substrate to be masked off must always be free of dust, dirt, grease and release agents.

## Applying masking tape correctly

The adhesive is activated by pressure and can only unfold its full adhesive force when sufficient pressure is applied. Lightly smoothing over it is not enough.

## Removing masking tape correctly

The masking tape should always be removed slowly and evenly at a 45° angle to the substrate. Do not wait until the coating material is completely dry; instead, peel off the masking tape while the paint is still wet. This prevents the tape from tearing and the paint from flaking off.

**XpertTIPS** 

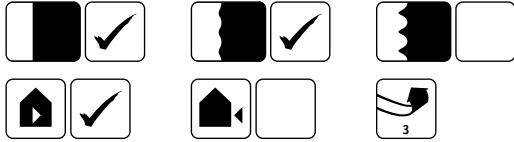

## Performing a test bond

There are many factors that can affect adhesive tapes and lead to unexpected results despite taking the above into consideration - such as the nature of the substrate, storage and processing conditions of the tape. We therefore always recommend that you carry out a test bond on an inconspicuous area before use.

## Masking tape Crepe

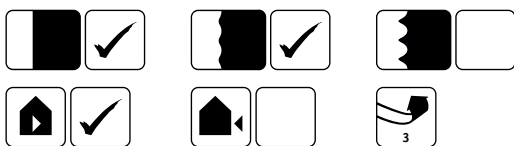

- For universal painting work indoors
- Medium strength natural rubber adhesive

Item no.	Width	Length	Colour	Adhesive type	PU	EAN

## Masking paper, self-adhesive

- For masking during painting work indoors
- Perfect format for window sills, radiators or staircases

Item no.	Width	Length	type of adhesive	Colour	PU	EAN
96992099	22.5 cm	50 m	acrylic	brown	15	4 013307 779131

## Fixing

### Holdings. Safe.

Whether you are grouting plasterboard, laying carpets or sealing parcels - the fixing tapes from COLOR EXPERT always hold firmly and securely.

### Gluing instead of drilling

Mounting straps are an uncomplicated alternative to screwed fixings.

### Laying tape, fabric

- For permanent bonding of floor coverings
- For floor coverings with structured backing
- Easier to remove again thanks to the fabric backing

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96414999	50 mm	10 m	white	synthetic resin adhesive	12	4 013307 783800
96415099	50 mm	25 m	white	synthetic resin adhesive	6	4 013307 783817

### Fixing tape, permanent

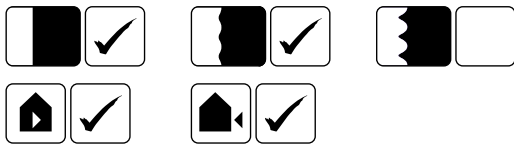

- For permanent bonding of floor coverings
- For floor coverings with smooth backing
- Can also be used for creative craft work

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96405099	50 mm	10 m	white	synthetic resin adhesive	6	4 013307 783862
96405199	50 mm	25 m	white	synthetic resin adhesive	6	4 013307 783879

## Installation tape Exteriors

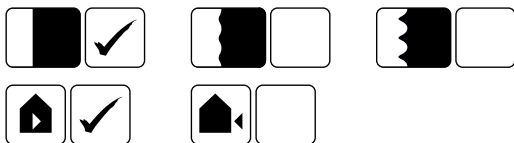

- For permanent fixing of objects on glass, steel, aluminium, ceramic and plastic
- Alternative to screwed fasteners

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96611999	19 mm	5 m	transparent	acrylic	4	4 013307 783824

## Installation tape, interiors

- For permanent fixing of interior objects
- Alternative to screwed fasteners

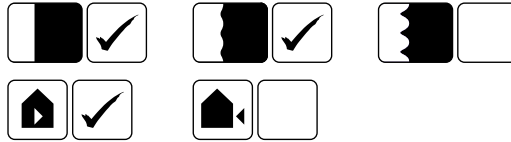

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96441999	19 mm	5 m	white	natural rubber	20	4 013307 783886

## Installation tape, skirting

- For precise fixing of skirting boards
- Good adhesion even on rough, fibrous and uneven wall structures

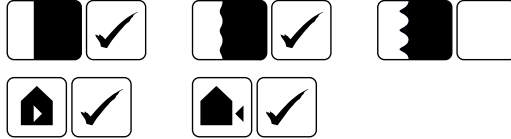

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96433899	38 mm	25 m	transparent	acrylic	2	4 013307 783916

## Sealing tape Aluminium

- For thermal insulation on pipes and for fixing and connecting insulation mats
- Also for sealing work, e.g. on downpipes

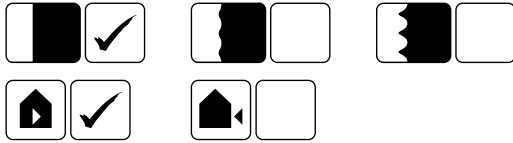

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96624899	48 mm	25 m	silver	acrylic	6	4 013307 791737

## Plasterboard filler tape Joint bridge

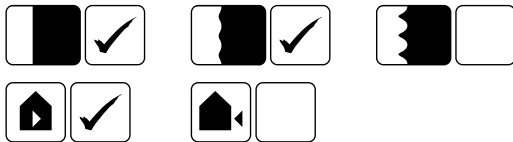

- Self-adhesive reinforcement tape for filling plasterboard joints
- Stabilises the filler and prevents crack formation

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96634899	48 mm	90 m	white	acrylic	4	4 013307 783930

## Anti-crack tape, crack bridge

- Self-adhesive tape for repairing small cracks and joints indoors
- Can be painted over and wallpapered directly

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96305099	50 mm	10 m	white	acrylic	6	4 013307 783923

## Barrier/warning tape

- For marking, cordoning off, securing and demarcating, e.g. construction sites
- In accordance with ISO 3864-1:2011

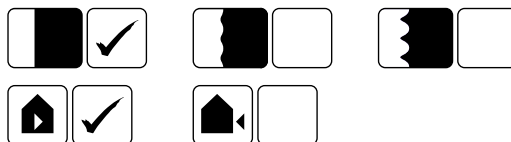

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96566199	80 mm	100 m	red-white	not self-adhesive	4	4 013307 783985

## Warning tape Self-adhesive

- For marking, securing and limiting obstacles
- Also for marking fragile shipping goods

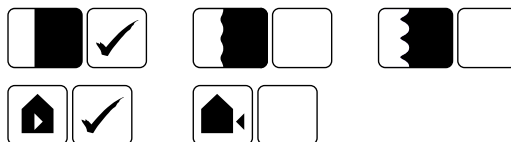

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96566099	60 mm	66 m	red-white	natural rubber	3	4 013307 784005

## Warning tape Self-adhesive

- For marking, securing and limiting obstacles
- Also for marking fragile shipping goods

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96556099	60 mm	66 m	black-yellow	natural rubber	3	4 013307 791843

## Packing tape Quiet operation

- For sealing boxes or packages
- Particularly quiet rolling
- Can be torn by hand

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96514899	50 mm	66 m	transparent	acrylic	12	4 013307 784029

## Packing tape Eco

- For sealing boxes or packages
- With environmentally friendly paper backing
- Easy to tear by hand

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96524899	50 mm	50 m	brown	natural rubber	12	4 013307 784012

## Packing tape

- For sealing boxes or packages

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96504810	48 mm	66 m	brown	acrylic	24	4 013307 315520
96514810	48 mm	66 m	transparent	acrylic	24	4 013307 315544

## Packing tape dispenser

- For unrolling and tearing off standard packing tape rolls
- For quicker and easier taping of cardboard boxes

Item no.	Material	Colour	PU	EAN
96520010	plastic	red-white	5	4 013307 320548

## Repair

### Fast and uncomplicated

Repair tapes can be used to repair many household items quickly and easily - at low cost and with little effort.

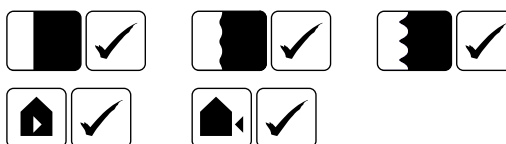

### Universal helper in everyday DIY life

Repair tape is also a must for DIY projects: They are ideal for fixing painter's fleece, sealing packaging or bundling building materials.

### Extra strong repair tape

- For repair and fixing work on dry substrates
- Robust fabric tape with very high adhesive strength and flexibility

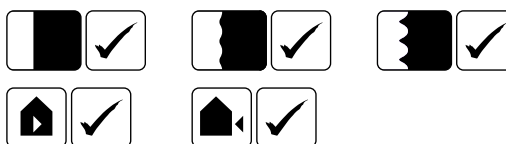

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96531099	50 mm	10 m	silver	natural rubber	6	4 013307 788768
96534999	50 mm	50 m	silver	natural rubber	6	4 013307 783848

### Repair tape Extra strong

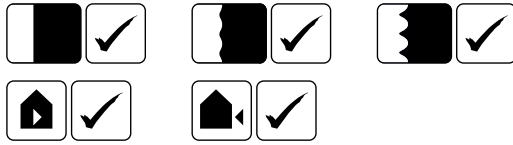

- For repair and fixing work on dry substrates
- Robust fabric tape with high adhesive strength and flexibility

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96534899	50 mm	50 m	black	natural rubber	6	4 013307 783831

## Strong repair tape

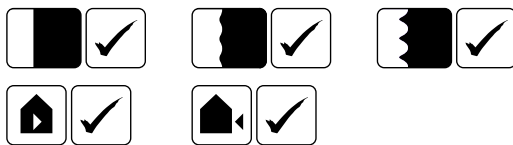

- For repair and fixing work on dry substrates
- Robust fabric tape with high adhesive strength and flexibility

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96194999	50 mm	10 m	silver	natural rubber	12	4 013307 783909
96195099	50 mm	50 m	silver	natural rubber	6	4 013307 320470

## Repair tape Strong

- For repair and fixing work on dry substrates
- Robust fabric tape with high adhesive strength and flexibility

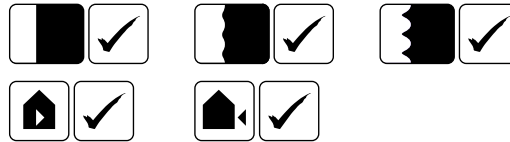

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96284999	50 mm	10 m	black	natural rubber	12	4 013307 783961

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96215010	48 mm	50 m	silver	hotmelt	6	4 013307 315643

## Weatherproof repair tape

- For exterior repairs
- Extremely strong and resistant
- Very UV- and water-resistant, and weatherproof

Item no.	Width	Length	Colour	Adhesive type	PU	EAN
96174899	48 mm	25 m	transparent	natural rubber	6	4 013307 783893

## The module

# Preparing the substrate

### One module for each work step

Sanding or wallpapering: The headers show your customer in which module they can find the corresponding tool.

### Immediately in the right segment

The panels separate the different product areas. Tools for the filler work step are shown separately.

### Highlighted products

The top products for the work steps are best presented additionally using vertical dividers. Eye-catchers that grab attention without getting in the way.

## Contents

### Dust protection mask

- For protecting the respiratory tract during demolition, grinding and insulation work
- Protects against fine dust
- With valve

Item no.	Protection class	capacity	PU	EAN
98625099	FFP2, EN 149	1x	10	4 013307 318200

### Dust protection mask

- For protecting the respiratory tract during light sanding work
- Protects against coarse dust

Item no.	Protection class	Contents	PU	EAN
98614099	FFP1, EN 149	2x	5	4 013307 318194

### Protective goggles

- Protects the eyes from dust and splinters during light demolition and sanding work
- Length-adjustable handle

Item no.	Information	PU	EAN
98650099	EN 166:2001-F	6	4 013307 702726

## Painter's overalls

- Protects against light paint splashes and coarse dirt during interior renovation work
- With hood, foot, arm and waist elastic

Item no.	Size	Material	PU	EAN
98680010	L 52-54	Polypropylene	10	4 013307 334088
98680110	XL 56-58	Polypropylene	10	4 013307 334095
98680210	XXL 60-62	Polypropylene	10	4 013307 334101

## "Gecko Grip" glove

- Very robust glove with microfoam coating for secure grip
- High wearing comfort, good fit, best tactile feel

Item no.	Size	Coating gloves	Protection class	PU	EAN
98560110	8	nitrile	CE Cat II, EN 388	12	4 013307 500490

# Prepare the substrate

Occupational safety and cleaning

## “Top Grip” glove

- Secure grip on smooth surfaces such as glass thanks to coarse nub structure
- Moisture-repellent coating

Item no.	Size	Coating gloves	Protection class	PU	EAN
98530110	8	nitrile	CE Cat II, EN 388	12	4 013307 500520
98530210	9	nitrile	CE Cat II, EN 388	12	4 013307 500537
98530310	10	nitrile	CE Cat II, EN 388	12	4 013307 500544

## “Aqua Grip” glove

- Good grip even on wet surfaces
- Slightly structured, moisture-repellent coating

Item no.	Size	Coating gloves	Protection class	PU	EAN
98570110	8	nitrile	CE Cat II, EN 388	12	4 013307 500551
98570210	9	nitrile	CE Cat II, EN 388	12	4 013307 500568
98570310	10	nitrile	CE Cat II, EN 388	12	4 013307 500575

## “Paint Grip” glove

- Protects when painting with paints, lacquers and varnishes
- Very durable and abrasion-resistant
- Smooth, moisture-wicking coating

Item no.	Size	Coating gloves	Protection class	PU	EAN
98512210	9	nitrile	CE Cat II, EN 388	12	4 013307 453383
98512010	10	nitrile	CE Cat II, EN 388	12	4 013307 435310

## “Senso Grip” glove

- For light painting jobs
- Extremely flexible
- Very good tactile sensitivity

Item no.	Size	Coating gloves	Protection class	PU	EAN
98540110	8	PU-coated	CE Cat I, EN 420	12	4 013307 500469
98540210	9	PU-coated	CE Cat I, EN 420	12	4 013307 500476
98540310	10	PU-coated	CE Cat I, EN 420	12	4 013307 500483

## Occupational safety and cleaning

### “Protect Grip” glove

- Moisture-repellent coating, slightly structured
- Very flexible
- Secure grip

Item no.	Size	Protection class	PU	EAN
98523510	10	CE Cat I, EN 420	12	4 013307 334507

### “Work Grip” glove

- Classic work glove, ideal for carrying construction materials such as stone and wood
- Cotton lining and split leather

Item no.	Size	Coating gloves	Protection class	PU	EAN
98581010	10	Split leather	CE Cat II, EN 388	12	4 013307 435327

### “Easy Grip” glove

- For light work around the house and garden
- Breathable and sweat absorbent cotton glove
- Dimpled surface for good grip

Item no.	Size	Coating gloves	Protection class	PU	EAN
98551010	10	Cotton	CE Cat I, EN 420	12	4 013307 334569

## Rubbish bags

- For disposing of light renovation waste and wallpaper
- With tieback

Item no.	Dimension	Film thickness	Volume	Colour	PU	EAN
96950599	94 x 69 cm	40 µm	110 l	blue	10	4 013307 394013

## Rubbish bags

- For disposing of light renovation waste and wallpaper
  - Particularly tear-resistant version with up to 80 µm
- Also suitable for moderate amounts of construction debris

Item no.	Dimension	Film thickness	Volume	Colour	PU	EAN
96950010	105 x 70 cm	40 µm	120 l	blue	10	4 013307 315070

## Remove colour

### SolidMaster

### Solid. Sturdy.

#### High-quality stainless steel blade

The high-quality, rigid blade with facet is perfect for removing old coatings, wallpaper and carpets.

#### Ergonomic 3C handle

A lot of force is often used when removing old coatings. It's a real treat if the tool sits well in the hand and has an anti-slip coating.

#### Removable impact cap

The back of the handle is equipped with a removable but stable impact cap. This means that the trowel can be used both with a hammer for more force and with a telescopic rod for increased working range

### SolidMaster Putty knife

- For removing old coverings such as carpets, filler residue, paint
- Ergonomic 3C handle with removable impact cap
- Can be used with telescopic pole

Item no.	Width	Sheet material	Blade flexibility	PU	EAN

## Hand sander with ergonomic handle

# SandMaster

### Ergonomic ball handle

Convenient and fatigue-free sanding even with high pressure forces. Non-slip coated surface for safe tool guidance.

### Easy fixing of abrasive

Quick-clamping flaps for easy change of abrasive. Significantly faster compared to screw clamps.

### Durable sponge rubber coating

Very dimensionally stable and durable – even under high forces.

## SandMaster Hand sander

- For manual sanding work with sanding discs and papers
- Ergonomic 2C ball handle
- Terminal strips for quick change of abrasive

Item no.	Size	Material	PU	EAN
93380299	178 x 86 mm	plastic	5	4 013307 701941
93380499	212 x 105 mm	plastic	5	4 013307 716969

# Grinding

Hand grinders, abrasives, wire brushes

## Hand sander

- For manual sanding work with sanding discs and papers
- With bow handle and screw terminals

Item no.	Size	Material	PU	EAN
93330099	228 x 82 mm	plastic	3	4 013307 318613

## Cork sanding block

- For manual sanding with sandpaper
- Can be used wet and dry

Item no.	Size	Material	Information	PU	EAN
93326010	115 x 60 x 25 mm	cork		10	4 013307 322634

## Sandpaper Essential Facts

Sanding is an essential step in preparing the substrate for subsequent coatings. The final result depends largely on the quality of the prepared area. Inadequate preparation can lead to damage and require extensive rework. The aim of sanding is to remove old coatings, dirt and rust as well as to shape the surface and roughen the substrate to ensure better adhesion of subsequent coatings.

### What does the grit tell you?

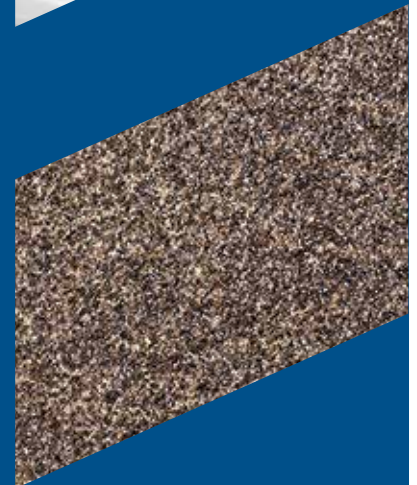

The grit indicates the mesh size of a sieve per inch through which the grain of the sandpaper can fall. A higher grit size means that the sieve has a finer mesh, which means that the abrasive grains must be correspondingly finer to fit through.

### From coarse to fine

Generally, sanding takes place in three steps. During pre-grinding (K40-80), a large amount of material is removed. The surface structure obtained is coarse. During intermediate sanding (K100-150), the coarse surface is already somewhat smoothed and only a moderate amount of material is removed. When it comes to fine sanding – finishing – (from K180) it is important to create a fine surface structure.

### From closed to open scattering

The type of scattering refers to the percentage of the abrasive carrier that is covered with grains. Closed-coating varieties are almost completely covered with grain and therefore offer good material removal. In contrast, semi-open and openly scattered abrasives provide buffer spaces for the collection of the sanding dust. Closed-coating sandpapers are perfect for sanding metal and open-coating variants are ideal for treating softer materials such as plastic or varnish and wood.

### Aluminium oxide sandpaper

- For simple sanding work on lacquers and plastics
- Closed coating

# Flexible. For filling and smoothing.

## High-quality stainless steel blade

The high-quality, flexible stainless steel blade is ideal for smoothing out cracks, holes and bumps to ensure optimal preparation for subsequent coating work.

## Ergonomic 3C handle

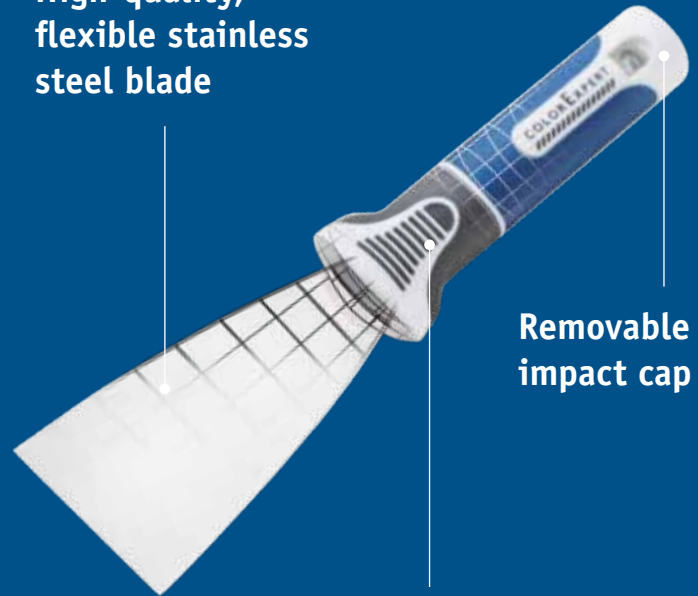

When filling and smoothing, the right material distribution and precision are important. Ideally, the tool fits comfortably in the hand and has an anti-slip coating.

## Removable impact cap

The back of the handle is equipped with a removable but stable impact cap. This means that the trowel can be used both with a hammer for more force and with a telescopic pole for increased working range.

# FlexMaster

## High-quality, flexible stainless steel blade

## Removable impact cap

## Ergonomic 3K handle

# Filling and smoothing

Spatulas, trowels, cartridge guns

## Smooth walls – just like a pro.

Smooth walls are the trend. The current focus in the living area aims to create a cosy atmosphere and give walls and ceilings a modern look. DIYers need both the necessary knowledge and the right painting tools to achieve flawlessly smooth walls.

### Filling walls

Prerequisite for a smooth wall is a flat, clean and adherent substrate. That is why the first step always involves filling work: Firstly, large recesses must be filled: e.g. joints in plasterboard walls, surfaces slotted for cables, expansion cracks and drill holes. In order to create a uniform surface that responds evenly to all further work steps, the entire wall must then be plastered over.

### Sanding walls

A one-off sanding, however thorough, is often not enough. To achieve a high surface quality, it is particularly important to sand and fill the wall several times, alternating between sanding and filling. Professionals use quality levels (Q1 to Q4) to differentiate the smoothness of a wall. A basic filling (Q1) is sufficient when applying tiles. The quality requirement for smooth walls (Q4), on the other hand, is only achieved by filling the entire surface and then sanding or felting.

### Applying non-woven wallpaper

A prerequisite for a smooth and uniform appearance of the wall is a non-woven wallpaper, because smooth non-wovens retain their shape after application. It does not expand on the substrate when wet and does not shrink when dry. The uniform absorbency of paintable non-woven wallpaper during coating ensures an even result – without shadows, cracks or other irritations.

### Painting walls

Rollers are not all the same. To ensure that a fine coat of paint is applied to the wall and that the surface quality achieved is not compromised, the right painting equipment must be used: a paint roller that is precisely matched to the smooth substrate and the quality of the paint used. For a fine roller texture on smooth walls, a roller with a low pile length is perfect for smooth surfaces.

- With printed measuring scale
- Coated and easy-to-clean surface

Item no.	Size	PU	EAN
95920515	300 x 60 x 78 cm	3	4 013307 325840

## Pasting device

- For even application of wallpaper paste
- Adjustable layer thickness
- Stainless steel housing with roller holder

Item no.	Size	Material	PU	EAN
95910015	60 cm	stainless steel	3	4 102440 006973

## Paste roller

- For even application of wallpaper paste on the wall
- Ergonomic angled 3C handle
- Sturdy cover

Item no.	Width	Core Ø	Wire Ø	Temple length	PU	EAN
86835899	18 cm	54 mm	8 mm	27 cm	5	4 013307 720027

## Paste syringe

- For filling air bubbles after wallpapering
- Incl. cannula

Item no.	Filling quantity	PU	EAN
95960099	20 ml	10	4 013307 319757

## Wallpapering brush

- For pressing on wallpaper
- With horsehair content
- Suitable for fleece and paper wallpaper

Item no.	Size	Material	PU	EAN
95892499	235 x 60 mm	wood	10	4 013307 718451

## Wallpapering brush

- For pressing on wallpaper
- Synthetic bristles
- Suitable for fleece and paper wallpaper

Item no.	Size	Material	PU	EAN
95891010	235 x 60 mm	wood	10	4 013307 790068

## Wallpapering wiper

- For pressing on wallpaper
- Synthetic bristles
- Suitable for fleece and paper wallpaper

Item no.	Size	Material	PU	EAN
95890899	300 x 25 mm	wood	12	4 013307 718444

## Application spatula

- For pressing on wallpaper
- Flexible plastic blade
- Three contact edges, ideal for fixing in corners and edges

Item no.	Length	PU	EAN
95881099	28 cm	12	4 013307 319740

## Application spatula

- For pressing on wallpaper
- Rigid plastic blade
- Can also be used as a cutting aid for ceiling and skirting finishes

Item no.	Length	PU	EAN
95885010	23 cm	10	4 013307 141693

# Wallpapering

Working aids, pressing tools

## Wallpapering made easy!

Wallpaper has a long tradition in the design of interior walls. There are many variants available in the retail trade, from classic paper wallpaper to woodchip wallpaper and non-woven wallpaper. From unusual and creative to robust and functional, the wallpaper can meet a wide range of requirements. Depending on the type of wallpaper, there are differences in the work process.

### Preparing the substrate

As always, it is important to create a dry, stable, absorbent, clean and sufficiently smooth surface for wallpapering. This means, for example, that filler and primer work may have to be carried out beforehand and that old coverings must be completely removed.

### Cutting wallpaper

Pre-cut your wallpaper sheets. You should always cut the wallpaper sheets a few centimetres longer than you think necessary. The excess is cut off later.

### Applying paste

This is where non-woven and paper wallpapers differ significantly in their processing: non-woven wallpapers can be applied using the wall-pasting technique. This means that the paste is applied directly to the wall with a paste roller, for example, and the dry wallpaper is placed directly into the paste bed. Paper wallpaper, on the other hand, must be pasted on the back of the wallpaper and soaked for approx. 10-15 minutes before being applied to the wall.

### Fixing wallpaper

Make sure the wallpaper is fixed to the wall. Various tools can be used for this. PU foam pressure rollers are particularly suitable for delicate wallpapers, while an application spatula or seam roller can be used to securely fix the wallpaper in the corners.

### Cutting off excess

Finally, cut off the calculated excess on the ceiling and floor. Use a trimming ruler or an application spatula, for example, as a cutting aid.

**XpertTIPS**

### Pressure rollers

- For pressing on wallpaper
- Ergonomic 3C handle
- Substrate-friendly PU foam, ideal for sensitive patterned wallpapers

## WoodStar

### The long-distance professional for all types of varnishes

Colour tank

GripZone

Rust-resistant metal clamp

#### Innovative bristle arrangement

Internal paint tank made of natural bristles with optimal material absorption capacity. External, fine finish bristles for perfect glazed surfaces.

#### More range, fewer drips

The integrated paint tank stores the liquid material and releases it in a controlled manner where it is needed. For 30% more material range compared to comparable products.

#### Ergonomic brush handles

The ergonomically designed brush handles ensure fatigue-free work and offer optimum grip.

# Glazing

Paintbrushes, surface brushes, sets

## Staining wood the right way

Whether it's about getting the balcony table ready for the outdoor season or giving an old garden shed a new lease of life: A coat of varnish can breathe new life into old gems and protect the wood from the elements, such as UV rays and moisture. Particularly important for wood lovers: transparent glazes matching the wood type highlight the characteristic colour and grain of the wood.

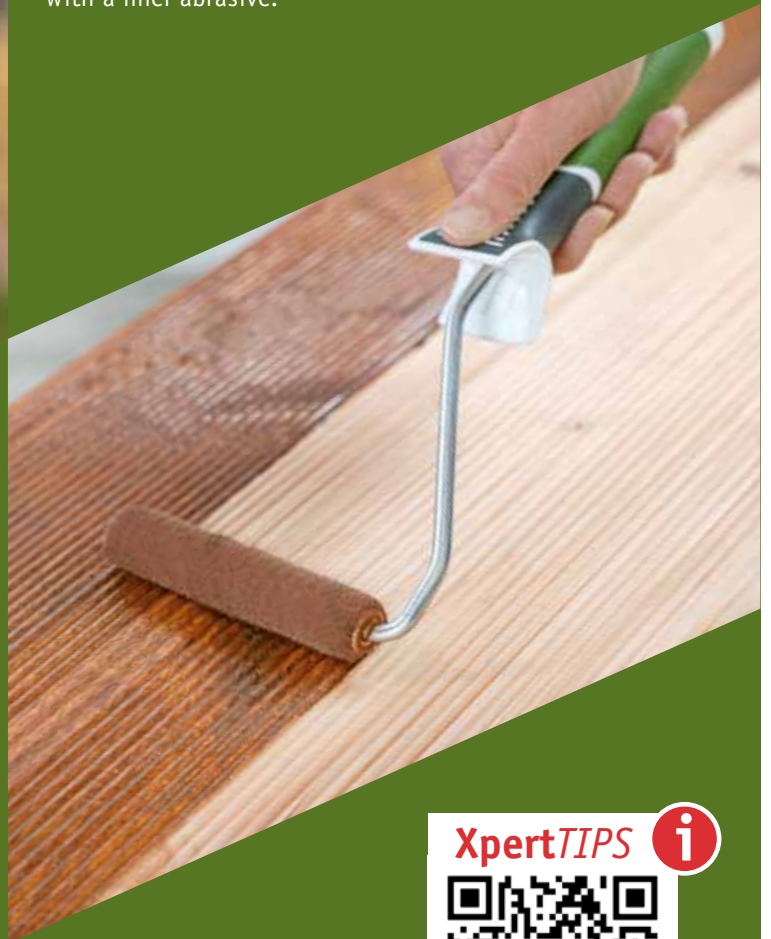

### Preparing wood

Thoroughly clean the wood of coarse dirt, grease and other impurities. Sand the surface to remove old coatings and then remove the sanding dust.

### Apply primer and carry out an intermediate sanding

Apply a primer to protect untreated wood against rotting in outdoor areas. The surface should then be sanded again with a finer abrasive.

### Applying varnish

Apply the varnish evenly in the direction of the wood fibres with a brush or varnish roller. Repeat the intermediate sanding and varnish application depending on how smooth and colour-intense the result should be.

**XpertTIPS**

Paintbrushes, surface brushes, sets

## Glaze mixed bristle

### High-quality bristle mixture

Genuine China bristles with high material absorption capacity combined with high-quality synthetic bristles for very good material distribution and even varnishing results.

### For a variety of varnishing applications

Whether for large-area work, difficult areas such as treads and slats or universal projects such as varnishing garden furniture – the series offers the right brush type for every application.

## Flat brush

## Stripping brush

Sometimes it's time for a new coat of varnish, especially if old coats are peeling off or you want to reveal the natural grain of the wood again. Paint stripper can help remove old coatings by chemically loosening the old coating from the substrate.

- **Rugged nylon bristles**  
The robust nylon bristles easily withstand the aggressive paint stripper and guarantee safe material application.
- **Ideal for paint strippers**  
Compared to other bristles, the nylon bristle is characterised by excellent acid and solvent resistance.
- **High-quality plastic clamp**  
The fully bonded plastic clamp ensures that the bristles remain securely anchored and no bristle loss occurs.

## Stripping brush

- For paint stripper application
- FSC®-certified hardwood handle
- Very high solvent and acid resistance

Item no.	Strength	Width	Thickness	Clamp material	PU	EAN
81475099	6.	50 mm	13 mm	Plastic	12	4 013307 743248

## Wax brush

Sealing wood with waxes is an environmentally friendly alternative to sealing with varnishes. Wax forms a protective layer on the wood without penetrating the wood like transparent glazes. The natural colour of the wood is emphasised.

- **Genuine natural bristle mix**  
The stabilised natural bristle ensures good absorption of the material and remains flexible and supple when used with characteristically sticky waxes.
- **Ideal for waxes**  
Wood waxes can be distributed very finely and evenly. For elegant and vibrant wood surfaces.
- **High-quality plastic clamp**  
The high-quality plastic clamp is fully bonded, which ensures the secure anchoring of the bristles and thus prevents bristle loss.

## Wax brush

- For applying wood waxes and oils
- FSC<sup>®</sup>-certified hardwood handle
- Very good material pick-up and dispensing

# The module

# Varnishing

## Varnishing

Where to find it: Thanks to our colour coding system, your customer immediately knows where to find the tool for painting work.

### Immediately in the right segment

Smooth substrate or rough surface? And what quality? Using the information for each substrate and the Better-Best icons on the panels, your customer can easily find exactly the tool they need.

### Simple solution: the 2in1 principle

The end user wants simple solutions. COLOR EXPERT offers them: with universal tools that are suitable for both solvent-based and water-soluble lacquers. Does my roller match my paint? Can I reuse this paint brush even though I don't know which paint I bought it for? Your customer doesn't want to or have to deal with such questions – thanks to COLOR EXPERT's 2in1 concept.

### Highlighted products

Perfect surface results thanks to our highlighted items, UniStar and EvoStar.

A vertical divider at the point of sale draws attention to these special products and encourages your customers to choose items of higher quality.

## UniStar

## The universal genius for all lacquers

### One for all

The UniStar guarantees high-quality painting results regardless of whether a solvent-based or water-based lacquer is used.

### High-quality synthetic bristle composition

Flexible bristle filaments with extra fine tips ensure good material application with a high-quality finish.

### Ergonomic brush handles

Whether in the high-quality plastic version or as a wooden version with GripZone: The ergonomically shaped brush handles ensure low-fatigue work and optimum grip.

## UniStar Flat brush

- For high-quality, universal painting work
- FSC®-certified hardwood handle with GripZone
- For water- and solvent-based lacquers

## Creating professional paint finishes

Achieving a high-quality paint finish without runs and streaks remains a challenging task in the world of coating work. However, by using high-quality tools and observing a few basic rules, DIYers can also do this successfully.

### Preparing the substrate

If necessary, remove old coatings, dirt, grease and dust from the substrate. Sand the surface and brush off the sanding dust.

### Apply primer and carry out an intermediate sanding

For wooden substrates, it is recommended to apply a primer to ensure an even absorptive capacity of the substrate.

### Applying paint

Now start applying the paint: first, edges are painted with the brush and then large areas are coated with the roller. It is important to always paint wet on wet and with horizontal and vertical movements.

### ...and again

During varnishing, at least two work processes are usually required to achieve an optimal top coat on the one hand and to avoid runs and streaks on the other hand. So repeat the intermediate sanding and painting process until the perfect paint surface is achieved.

# The brush for mirror-smooth varnish surfaces

## Super soft

The ultra-fine, pointed bristles ensure excellent material distribution and prevent streaks in the paintwork.

## Super full

Thanks to the high filament volume, sufficient material can be absorbed and dispensed again in a controlled manner.

## Solid

The filaments are particularly dimensionally stable and resistant to swelling. This guarantees a consistently high-quality result and high processing quality.

## Rollers, sets

### EvoStar

### The paint roller refill for the perfect surface finish

#### Concave roller ends

Ensures optimal pressure compensation during rolling and thus prevents the formation of tram lines. Compared to other roll shapes, the entire length is used efficiently.

#### Refined foam surface

Very dense, fine-pore foam with special treatment ensures a first-class surface finish with good material application.

#### Suitable for all lacquers

Easy to use for water-based and solvent-based lacquers. Guarantees high-quality results on smooth surfaces.

Suitable for all paints

# High-quality paint finishes with good covering power

## Durable high density cover

Extremely dimensionally stable fibre and therefore also suitable for tough special lacquers such as rust protection lacquers and parquet sealants.

## High layer thickness, high result quality

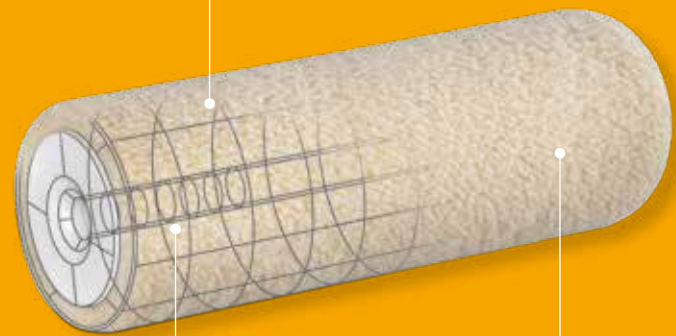

Very good material application without the formation of bubbles and runs. This makes it ideal for initial painting and work on textured substrates.

## Easy to use

Very even and quick paint application possible.

## Rollers, sets

### Foam paint roller

#### Justifiably a classic

The foam roller has long been proven for universal painting work on smooth surfaces. With different roller widths, small to medium-sized surfaces can be ideally coated.

#### Fine layers and surfaces

The fine foam structure ensures a fine application of material, which leads to a high-quality result in several varnishing procedures.

## For special cases

High-quality nylon cover – specially designed for use with viscous materials such as floor and garage coatings or liquid plastic.

## Extremely robust

Thanks to the highly twisted nylon cover with its dimensionally stable fibres, the surface of the cover remains open, does not stick and thus ensures a permanently smooth rolling process.

## Sealant roller

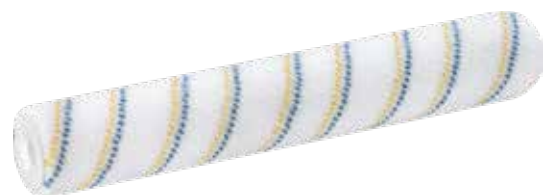

- For demanding floor sealing and coatings
- Ergonomic 1C handle
- Ideal for very viscous lacquers

# The module

## Painting walls

### Painting walls

Your customer knows exactly what they are planning: Painting walls. The header guides them to the right shelf.

### Immediately in the right segment

Using the substrate and Better-Best icons on the panels, your customer can easily find the tool they need – in the quality they want.

### Well sorted, optimal guidance

The different tools in the “Painting walls” area are clearly arranged in the three modules: from brushes and rollers to handles and paint trays. Substrate patterns on the baskets make it easier to choose rollers. Right in front of them: the roller that matches the substrate – to look at and feel.

### Highlighted products

The vertical divider draws the end consumer's attention to the special products at the POS.

## Bright paint brush

### Like natural bristles – but more stable

Synthetic bristles ensure a permanently dimensionally stable brush head – essential for precise colour definition. Sharpened bristle filaments, which emulate the structure of natural bristles, prevent streaking in the brush pattern.

### Ergonomic brush handles

The ergonomically designed brush handles, whether made of high-quality plastic or wood with GripZone, ensure low-fatigue work and offer optimum grip.

# Bright light paint brush

## Sturdy synthetic bristle

The sturdy synthetic bristles ensure a permanently dimensionally stable brush head, which is essential for precise colour definition. The adapted bristle density in 6th thickness is ideal for applying fine layer thicknesses.

## High-quality hardwood handle

The beech wooden handle sits well in the hand and ensures optimal brush guidance.

## Flat brush

- For universal painting work
- FSC<sup>®</sup>-certified hardwood handle
- Controlled paint dispensing

# Modler brush

## A truly natural product

Pure natural bristles that are rarely used today. Cooked several times in the production process to achieve its high stability and durability.

## Traditional and versatile

Whether as a creative effect tool, for applying linseed oil paints or as an adhesive brush for wallpapering – the Modler impresses in a wide range of applications.

## Modler brush

- Can be used as an effect tool for creative techniques, glue brush or for applying linseed oil paints
- Highly solvent resistant

### WallStar 2.0

### For a superior finish on smooth surfaces

Excellent ink absorption and release

#### Perfectly smooth surfaces

...thanks to the lint-free special cover with chamfered roller ends. This means no lint and tram lines in the paint pattern. For a spray-like surface finish.

#### Pleasant to use

Thanks to the balanced fibre composition of high-quality polyester continuous filament yarn and absorbent microfibre, good material coverage and fine colour distribution are achieved in one work step.

Optimised fibre blend

#### Continuation of the successful WallStar series

The WallStar 2.0 is the result of permanent product optimisation. The already successful WallStar plush has been further developed – for even better work results.

Lint and streak-free surfaces

## WallStar

Very good ink absorption and release

Very hard-wearing

High square metre performance

## Best performance on rough and coarse surfaces

**Ideal for textured and rough surfaces**

High-quality polyamide cover with highly dimensionally stable thread. Resistant to mechanical stresses when rolling on structured surfaces. For all wall and façade paints.

**High colour coverage in every recess**

High pile and padding on the façade roller ensure that enough paint reaches into every recess – for optimal material coverage. Even corners can be easily painted thanks to the cover folded in on the side.

**Durable and reliable**

Even on large façade and extensive areas, the WallStar retains its high-quality fibre properties. As a result, it guarantees a uniform and flawless surface appearance, free of lint.

## Rollers, sets

### Linomat

### Precision and speed

Sophisticated colour separation technology

Special plush for colour separation

Ergonomic 3K handle

#### Precise colour separation without masking

Thanks to the integrated colour separation technology, consisting of a folding protective plate with a brush line that is gentle on the surface, precise colour demarcation is achieved without masking.

#### A must-have for every painting project

Ideal for colour demarcation on corners, edges, door and window frames. Perfect on smooth walls.

#### Special plush for colour separation

High-quality polyamide plush with the best paint absorption and dispensing. Perfect for even colour coverage on all edge areas.

### Linomat Paint roller

## Special rollers

### Problem solvers for difficult cases

The Colour Expert special rollers are practical helpers for very special requirements. Their objective: Best work results, time-saving material processing and a high level of ergonomics.

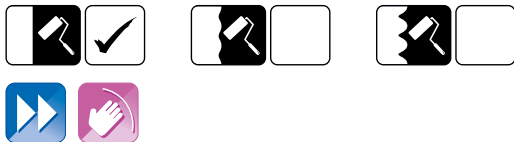

### They can be used to put any material on the wall

Whether an extra robust nylon cover for roller plaster, highly absorbent microfibre for thin primers or a specially shaped roller that reaches into every corner of the room – they make it easy to apply the material.

## Roller plaster roller

- For applying and structuring fine roller plasters
- Ergonomic angled 3C handle
- Faster application than with the trowel

# PowerMaster

## The bend makes the difference

### Defined bends

Ensure optimal rolling characteristics and minimal force required for paint application. For particularly ergonomic and low-fatigue work.

### Ergonomically shaped handle

Non-slip surfaces, ergonomic handle design and GripZone thumb rest ensure comfortable tool guidance. The handle is also compatible with all available telescopic poles.

### High-quality materials

The galvanised steel wire ensures a long service life.

## Painting tools – but sustainable!

A green lifestyle and a healthy indoor climate have long been central themes when it comes to DIY projects. It's not surprising then that the conscious purchase decision doesn't stop with the paint. That's why COLOR EXPERT offers the entire 1K accessory product portfolio made from environmentally friendly, fully recycled plastic.

### Resource-saving post-consumer material

Plastic from consumer waste is processed again during recycling. This saves the use of additional crude oil and reduces CO2 emissions in production.

### The complete range – completely sustainable

Whether paint tray, bow handle or scraper grid – the range of accessories allows renovation projects to be carried out in an environmentally friendly way.

94390010	8 x 16 cm	plastic	10 4	013307 792109

### Ensuring longevity

The longevity of paint rollers is one of their quality features. Regular care before and after use, as well as proper storage, can not only extend this, but also reduce the material consumption of paint.

### Before use

Before using it for the first time, the paint roller should be washed under clear water to remove loose lint and activate the paint absorption capacity of the fibres. Then let the roller air dry completely or roll it out on a cardboard box.

### Storage during work breaks

During work breaks, the paint roller should be sealed airtight in the reusable roller blister packaging. This prevents contamination from dirt and stops the paint from drying – for up to 7 days.

### Cleaning after painting

Remove excess paint first with a paint roller wiper; this saves water and time. In addition, the paint can be returned to the container and used again later. Then rinse the roller thoroughly with lukewarm water and a little soap. Allow the roller to air dry completely.

### Note:

Please observe the manufacturer's instructions for the correct disposal of solvent-based paints, varnishes and transparent glazes.

**XpertTIPS**

# Compact packaging.

We have put together practical painting tool sets especially for popular and common projects. With a very good price-performance ratio, your customers have everything they need for their current project in their cart. With compact packaging and helpful explanations. This means that the sets also enable inexperienced end users to achieve professional results.

## Quality at your fingertips

- Practical complete sets
- Project-specific compilation for all common applications
- For seasonal placements, open spaces, centre aisle and special placements
- Attractive and self-explanatory packaging concept
- Ideal offer for impulse purchases

# Professional painting tools

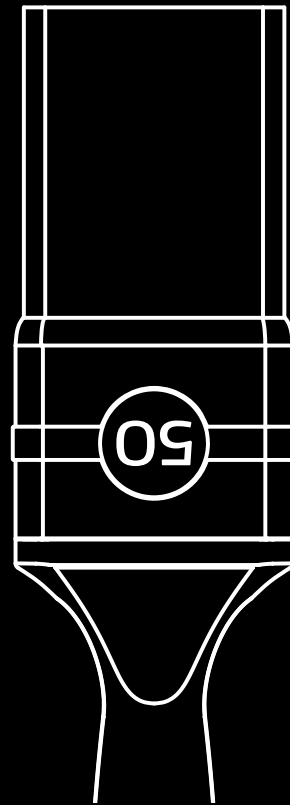

More and more professional tradespeople are purchasing their tools and materials from DIY stores. These professional craftsmen and a growing number of ambitious DIYers expect particularly high-quality tools for a professional work result.

Our range of professional painting tools is specially tailored to the requirements and projects of professionals in terms of performance, quality and durability. For example, it offers high-quality tools for the professional application of plasters and fillers as well as for Q4 surfaces.

## High-performance. High-quality. Durable.

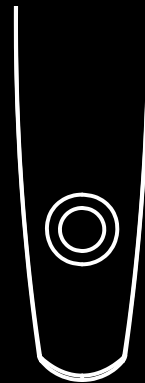

- Special range for craftsmen and ambitious DIYers
- For the work areas of painting, varnishing and the processing of plasters and fillers
- Packaging with 6 or 8 languages for a simple purchase decision without the need for advice
- Attractive, professional-oriented design

# THAT'S WHAT COLOR EXPERT PROFESSIONAL PAINTING TOOLS ARE FOR

## Painting tools for professional demands

In addition to the traditional customer groups – amateur craftsmen, DIY enthusiasts, hobby gardeners – more and more tradespeople are buying their tools from DIY stores. In particular the so-called mobile generalists, who often operate as one-man businesses and offer painting, plastering and drywalling work without their own workshop. This customer group brings new requirements: As professional tradespeople, they expect their tools to function correctly and produce professional results. In addition, there is a growing number of DIY enthusiasts who expect products of professional quality.

### **High-performance. High-quality. Durable.**

COLOR EXPERT has therefore developed a range of painting tools tailored to professional requirements and expectations – especially for demanding projects – in terms of performance, quality and durability.

### **Compact painting tool range**

From paint rollers and paint brushes to special rollers for plaster application: Oriented to the needs and tasks of craftsmen and ambitious DIY enthusiasts, the range offers professional products for painting, coating and varnishing. High-quality solutions for the processing of plasters and fillers in different quality grades complete the range. Products for DIY customers – developed and produced by the number one in Europe for painting tools – in professional quality.

### **Target group-oriented design**

With professional painting tools for professional demands, COLOR EXPERT offers an optimal addition to its DIY range: Durable products for painting and plastering work made of high-quality materials. But the professionally equipped and designed module also enriches any DIY store as a stand-alone range, in powerful colours and a design tailored to the target group.

# THE POS CONCEPT FOR PROFESSIONAL DEMANDS

## Attractive and intuitive

Thanks to its attractive design in black and orange, the professional module is an eye-catcher in the store. The clearly structured, intuitive system guides customers quickly and safely to the right product on the shelf: The horizontal dividers show them the product group. The basket panels lead to the respective application and provide easy-to-understand information on materials and surfaces. In this way, they guide customers precisely to the right product for the respective application. Special icons underline the outstanding quality of the products.

## For professionals and ambitious DIYers

The multilingual packaging of the products – in six or eight European languages – creates security and ensures a quick, consultation-free purchase decision. Customers can easily and quickly find the right tool on the shelf to achieve the optimum result for their application. The range thus creates real benefits for professional users and ambitious DIY enthusiasts – and for retailers.

## Eye-catchers and highlights

Vertical dividers, information signs and attractive mood-setting photos serve as eye-catchers and draw customers' attention to special product highlights. They provide detailed information on the features, applications and advantages of the professional products. Light-collecting dividers between the baskets attract customers' attention and create bright, visual highlights.

	Smooth wall		Painting
	Rough surface		Coating
	Coarse plaster		Varnishing

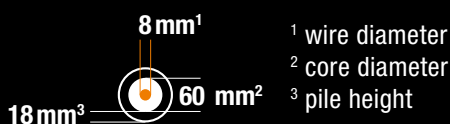

You can recognise our FSC® certified products by this label.

## Non-verbal and international

The demand of professionals: the optimal professional paint roller for every surface. Non-verbal, internationally understandable icons indicate the surface suitability (smooth wall, rough surface, coarse plaster) and further product information.

Photos convey a concrete picture of the application, to ensure that customers reach for the perfect tool.

## 01 PROFESSIONAL BRUSHES, SURFACE BRUSHES AND CEILING BRUSHES

**P**ainting tools for professionals must achieve a first-class result – fast, suitable for large areas, durable. The professional brushes from COLOR EXPERT are made for just that. First-class finish, high surface performance, enormous durability and longevity – this is what the brushes are designed for. Whether for emulsion paint, water-based or solvent-based lacquers – the range has brushes for every application. From flat, corner, ring and capsule brushes to façade brushes and surface brushes to ceiling brushes, the range covers all needs for day-to-day professional work.

## BRUSHES FOR PAINTING AND VARNISHING

The premium all-rounders and guarantors of first-class results with all paints and varnishes. Whether emulsion, water-based or solvent-based lacquers, the brushes can be used quickly and efficiently to achieve high-quality surface results.

The high bristle volume ensures good material pick-up and controlled material dispensing. The fine bristle filaments ensure a very good finish in the first coat.

Another plus point: thanks to its high dimensional stability and easy cleaning, the premium synthetic bristle mixture is consistently designed for durability and long-term use on job sites. Their extremely robust bristles ensure 5x longer durability compared to natural bristles.

### Flat brush 30 mm

Item no. 81 08 30 97 | Pack of 12

- For all paints and lacquers
- Non-swelling plastic clamp
- 12. thickness
- For fine painting and varnishing jobs

### Flat brush 50 mm

Item no. 81 08 50 97 | Pack of 12

- For all paints and lacquers
- Non-swelling plastic clamp
- 12. thickness
- For fine painting and varnishing jobs

### Flat brush 60 mm

Item no. 81 08 60 97 | Pack of 12

- For all paints and lacquers
- Non-swelling plastic clamp
- 12. thickness
- For fine painting and varnishing jobs

# 01 PROFESSIONAL BRUSHES, SURFACE BRUSHES AND CEILING BRUSHES

## Corner brush 35 mm

Item no. 81 60 35 97 | Pack of 6

- For all paints and lacquers
- Non-swelling plastic clamp
- For corners, recesses and wall joints
- For fine painting and varnishing jobs

## Corner brush 50 mm

Item no. 81 60 50 97 | Pack of 6

- For all paints and lacquers
- Non-swelling plastic clamp
- For corners, recesses and wall joints
- For fine painting and varnishing jobs

## Corner brush 60 mm

Item no. 81 60 60 97 | Pack of 6

- For all paints and lacquers
- Non-swelling plastic clamp
- For corners, recesses and wall joints
- For fine painting and varnishing jobs

## BRUSH CLAMPS: PLASTIC OR METAL?

The classic image of a brush is probably the one with a metal clamp. But is the usual always the best? Not in this case: high-quality polyamide clamps offer significant advantages over metal clamps:

- There is no risk of rust and thus discoloration in the paint pattern.
- Thanks to the fully moulded, liquid-tight plastic clamp, the bristles sit securely in the holder. This prevents loss of bristles due to swelling.

All in all, plastic clamps are a real quality feature, especially when it comes to durability.

## Ring brush size 02

Item no. 83 50 02 97 | Pack of 6

- For all paints and lacquers
- Rustproof ring clamp
- Double thread
- For fine painting and cutting work

## Ring brush size 04

Item no. 83 50 04 97 | Pack of 6

- For all paints and lacquers
- Rustproof ring clamp
- Double thread
- For fine painting and cutting work

## Ring brush size 08

Item no. 83 50 08 97 | Pack of 6

- For all paints and lacquers
- Rustproof ring clamp
- Double thread
- For fine painting and cutting work

# 01 PROFESSIONAL BRUSHES, SURFACE BRUSHES AND CEILING BRUSHES

## FINISHING BRUSH

Thin, water-based lacquers place particularly high demands on their processing and tools due to their low viscosity and short drying times. The high-quality finishing brush was specially developed for this purpose:

It is characterised by a high filament volume for a high material holding capacity with slow and controlled material dispensing.

Extremely fine, flexible and conically pointed bristle filaments ensure good spreadability of the material and mirror-smooth paint surfaces, without “sliding” and streaks.

Made for particularly fine paint jobs.

- Painting
- Coating
- Varnishing

### Flat brush 30 mm

Item no. 81 90 30 97 | Pack of 12

- For water-based lacquers
- Non-swelling plastic clamp
- 12. thickness
- For the finest paint jobs

### Flat brush 50 mm

Item no. 81 90 50 97 | Pack of 12

- For water-based lacquers
- Non-swelling plastic clamp
- 12. thickness
- For the finest paint jobs

### Smoothing brush 75 mm

Item no. 81 91 75 97 | Pack of 6

- For water-based lacquers
- Rustproof clamp
- Minimum thickness
- For the finest paint jobs

## Capsule brush 15 mm

Item no. 83 33 15 97 | Pack of 12

- For water-based lacquers
- Rustproof capsule
- Tapered bristles
- For the finest painting and trimming work

## Capsule brush 21 mm

Item no. 83 33 21 97 | Pack of 12

- For water-based lacquers
- Rustproof capsule
- Tapered bristles
- For the finest painting and trimming work

## Capsule brush 25 mm

Item no. 83 33 25 97 | Pack of 6

- For water-based lacquers
- Rustproof capsule
- Tapered bristles
- For the finest painting and trimming work

# 01 PROFESSIONAL BRUSHES, SURFACE BRUSHES AND CEILING BRUSHES

## FAÇADE BRUSHES AND SURFACE BRUSHES

Painting work on façades puts extreme strain on a brush bristle due to its coarse and sandy surface structure. At the same time, it must have a high degree of flexibility in order to be able to reach all surface areas optimally with material.

The highly durable brush façade is specially designed for this purpose:

The high-quality bristle mixture has very robust synthetic filaments with very good flexibility and dimensional stability – for optimal material transfer and long service life.

Painting

Coating

Varnishing

### Façade brush 50 mm

Item no. 81 20 50 97 | Pack of 6

- For façade paints
- Rustproof clamp
- 6. thickness
- Highly durable

### Façade brush 75 mm

Item no. 81 20 75 97 | Pack of 6

- For façade paints
- Rustproof clamp
- 6. thickness
- Highly durable

### Surface brush 30 x 120 mm

Item no. 83 60 12 97 | Pack of 6

- For façade paints and wood protection
- Rustproof clamp
- Metal bucket hook
- Highly durable

## CEILING BRUSH FOR BRUSH RENDERING

In addition to professional users, ambitious DIY enthusiasts are increasingly daring to do the plastering work in their own homes. Brush rendering and roller plaster are particularly popular, and can be processed more easily with familiar tools such as brushes or rollers.

The special ceiling brush for brush rendering offers the optimum properties for a professional result:

Equipped with very dense vulcanised bristles, it ensures good material transfer, good coat thicknesses and optimal surfaces. Thanks to the dimensionally stable synthetic filaments, the brush is easy to clean and guarantees a long service life. Also ideal as an effect tool for structuring after plastering.

**Painting**

**Coating**

**Varnishing**

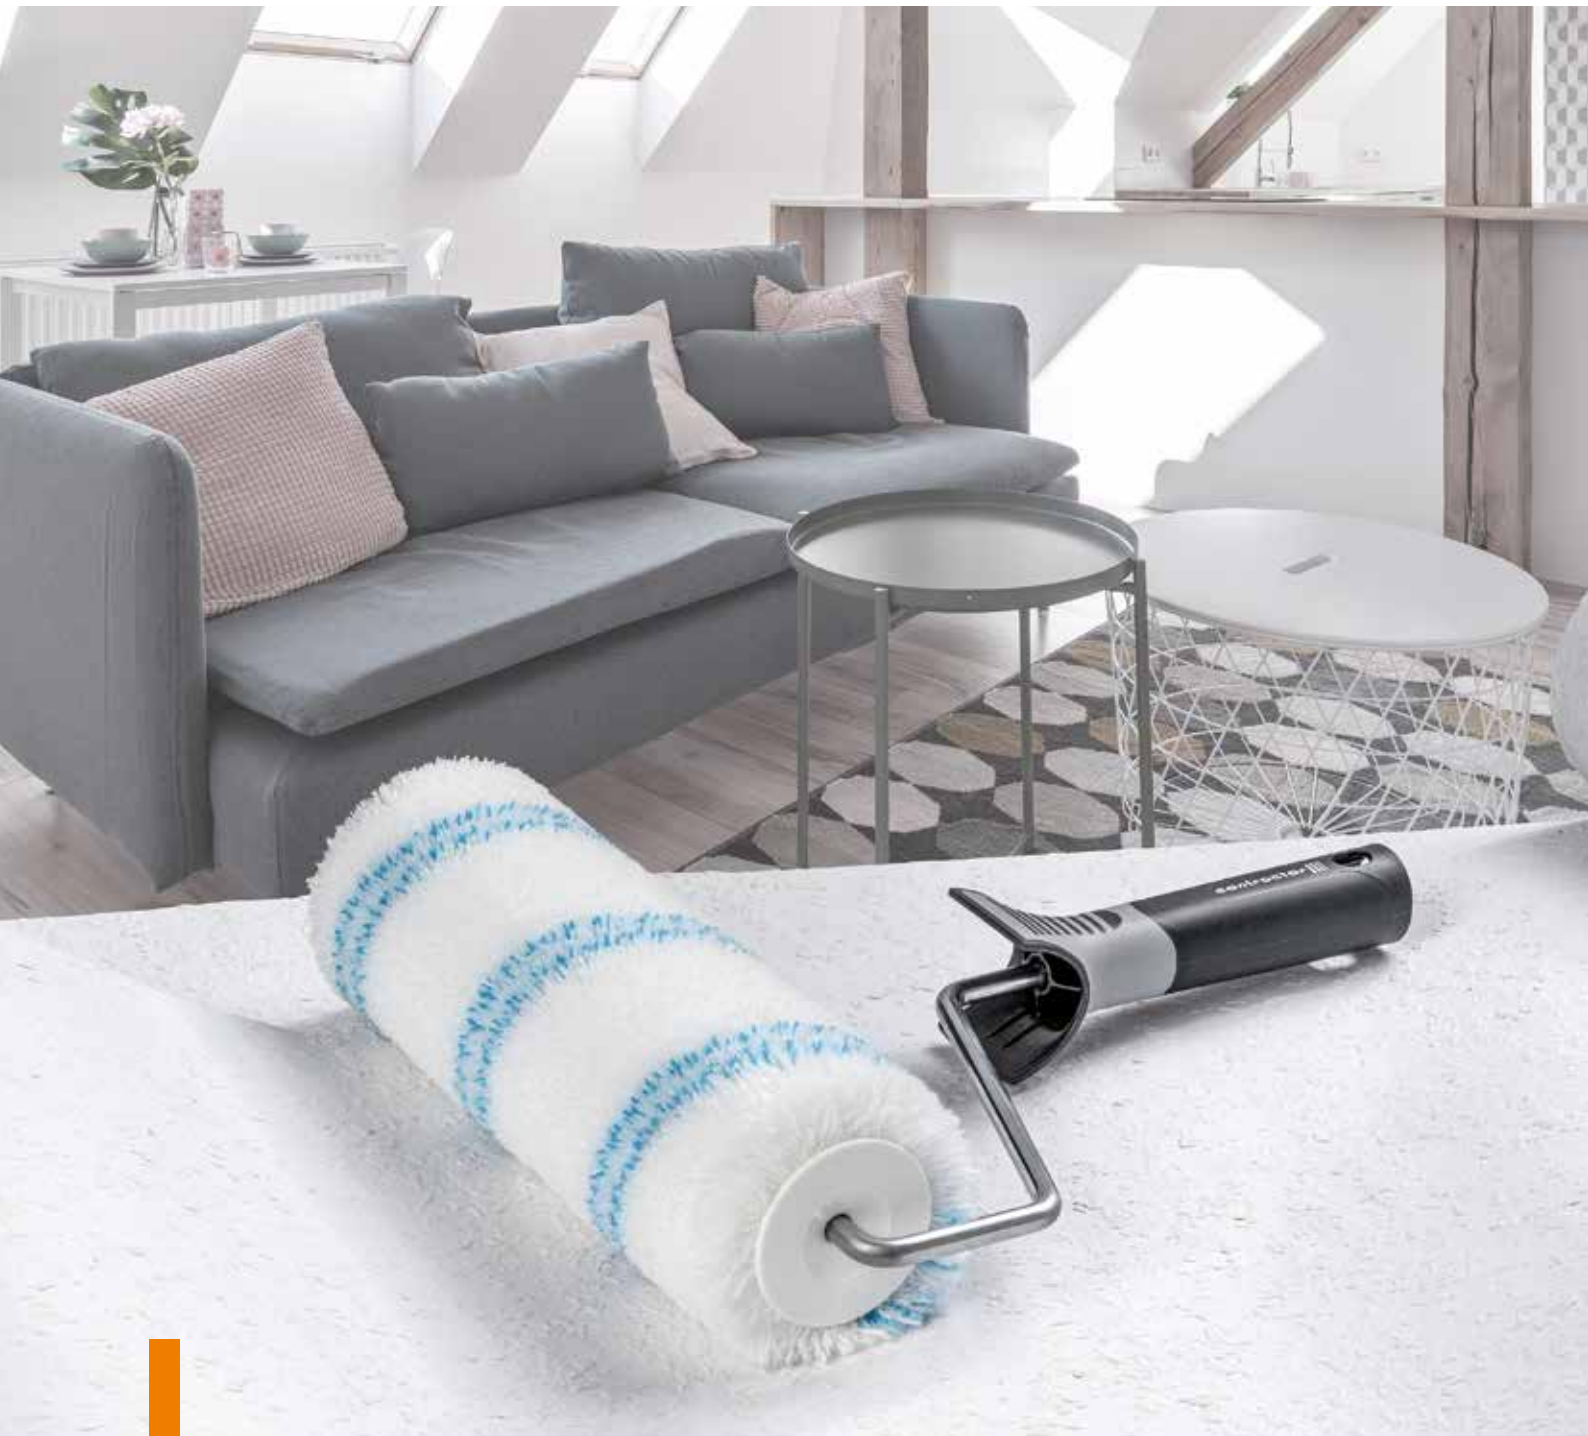

### Ceiling brush 180 x 80 mm

**Item no. 83 80 75 97 | Pack of 2**

- For brush rendering and roller plaster
- High density vulcanised bristles
- Low-spatter
- Can also be used as an effect tool

## 02 PROFESSIONAL PAINT ROLLERS, ROLLER REFILLS AND SETS

**P**riming or painting walls, varnishing or coating – professionals need tools for their work that are specially tailored to the respective application, durable and suitable for large areas. Like the professional rollers and roller refills from COLOR EXPERT: Durable, hard-wearing and easily washable roller refills for professional material application.

# LOTEx DISPERSION ROLLER

The guarantee for high-quality and long-lasting painting results:

The high-quality cover made of polyamide continuous fibre with additional LoTex finish combines valuable material properties with a high level of durability. LoTex permanently protects the fibre from felting and prevents the cover from clogging. This facilitates cleaning after use and ensures that the high-quality properties of the polyamide continuous fibre are permanently protected.

This enables high and consistent material transfer for high m<sup>2</sup> performance with the first coat and a first-class lint-free painting pattern.

## LOTEx: LASTS LONGER, GOES FURTHER, COATS BETTER

The special LoTex finish offers continuous fibre protection and thus ensures

- high paint absorption and dispensing,
- a very good lint-free paint pattern,
- time savings due to reduced number of immersion processes and easier cleaning after use.

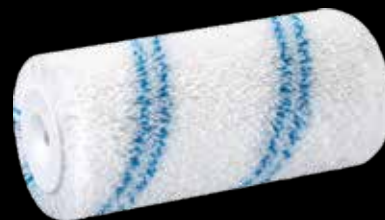

The safe choice for high-quality paint jobs; available for all substrates. Made for continuous use; made for professionals.

## Q4 FINISHING ROLLER

Smooth, filled wall surfaces with the highest surface quality are increasingly playing a role on construction sites and in renovation projects. It goes without saying that a top coat must also meet the outstanding requirements for very smooth walls. The high-tech blended fibre of the Q4 finishing roller meets this requirement with ease:

It ensures an excellent paint pattern, even in areas prone to grazing light. The extra strongly chamfered roller ends prevent the formation of rolling marks.

# 02 PROFESSIONAL PAINT ROLLERS, ROLLER REFILLS AND SETS

## MICRO GLAZE AND DEEP PRIMER ROLLER

Thin-layer glazes and deep primer have one thing in common: extremely low viscosity.

The Micro glaze and deep primer roller is particularly suitable for such low-viscosity materials. Its highly absorbent cover with high material capacity reduces dripping during processing and ensures efficient material application.

It is ideal for primer work on gypsum boards, for example, or wood protection work with varnishes or weather protection paints on all types of wood.

- Painting
- Coating

Item no. 85 36 12 97 | Pack of 10

- Aqueous surfacer
- Weatherproof paints
- Varnishes

## FELT PAINT ROLLER

When using solvent-based paints, classic foam rollers can reach their limits with regard to the spreadability of the material and the first coat application. Felt rollers offer a high-quality alternative:

They have a heavily felted polyester continuous cover, which ensures very good material transfer and smooth distribution of the material. Very good coat thicknesses are achieved in the first painting process. As a large-area roller, it is ideal for applying parquet sealants and is a sensible alternative to classic velour rollers.

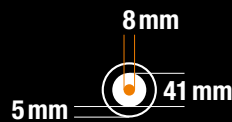

### Felt paint roller 18 cm

Item no. 84 34 18 97 | Pack of 10

- Thin solvent-based lacquers
- Rust protection lacquer
- 1K parquet sealants

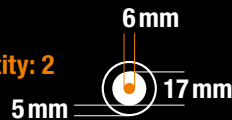

### Felt paint roller 10 cm

Item no. 86 60 11 97 | Pack of 10 | Quantity: 2

- Thin solvent-based lacquers
- Rust protection lacquer
- 1K parquet sealants

### Felt paint roller 12 cm

Item no. 86 60 30 97 | Pack of 10

- Thin solvent-based lacquers
- Rust protection lacquer
- 1K parquet sealants

### Felt varnishing set 4 x 10 cm

Item no. 86 60 72 97 | Pack of 14

- Thin solvent-based lacquers
- Rust protection lacquer
- 1K parquet sealants
- Paint tray 14 x 27.5 cm and handle

# 02 PROFESSIONAL PAINT ROLLERS, ROLLER REFILLS AND SETS

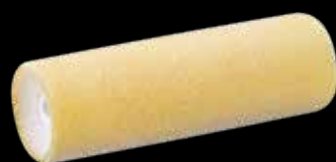

## FOAM PAINT ROLLER

Foam rollers have a long tradition for high-quality and fine paint application. Various roller designs have become prevalent, depending on user preference.

Compared to straight foam rollers, rounded roller ends reduce the formation of rolling marks. Concave roller designs ensure optimum pressure distribution and thus a streak-free surface with efficient use of the entire roller length.

The finest foam grades ensure an even paint finish without blistering.

- Painting
- Coating
- Varnishing

### Flock paint roller 11 cm, concave

Item no. 86 77 11 97 | Pack of 10 | Quantity: 2

- Water-based acrylic varnishes
- Water-based PU varnishes

## FLOCK – FOR THE FINEST FINISH

High-quality varnishing with low-viscosity water varnishes is one of the most challenging tasks, even when using roller refills.

Flocked foam rollers are an ideal aid, as their fine polyamide bristles fulfil two functions:

- they form many small gaps, which allows good material pick-up and dispensing.
- During the rolling process, they puncture air bubbles and ensure a perfect, mirror-smooth surface.

### Foam paint roller 11 cm, rounded

Item no. 86 74 45 97 | Pack of 10 | Quantity: 5

- Water-based acrylic varnishes
- Water-based PU varnishes

## NYLON SEALANT ROLLER

Floor coatings for garages, industrial halls and warehouses need to be hard-wearing and durable, just like the tool they are applied with.

The Nylon sealant roller perfectly meets these extreme requirements. The super-robust, short-pile polyamide continuous fibre ensures good spreadability of high-viscosity materials without sticking over time.

This makes it the ideal tool for special applications based on two-component varnishes, resins and liquid plastics.

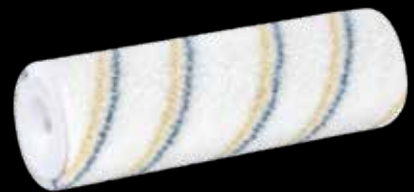

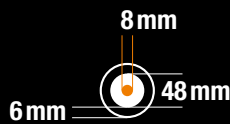

- Painting
- Coating
- Varnishing

### Nylon sealant roller 18 cm

Item no. 84 31 18 97 | Pack of 10

- Viscous solvent-based lacquers
- 2K paint systems
- Epoxy resin

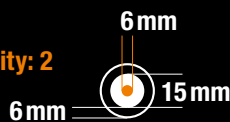

### Nylon wood protection roller 10 cm

- Viscous solvent-based lacquers
- 2K paint systems
- Epoxy resin

# 02 PROFESSIONAL PAINT ROLLERS, ROLLER REFILLS AND SETS

## NYLON COATING ROLLER

The Nylon coating roller is a classic all-rounder for processing difficult materials.

Difficult materials: These are slightly viscous coatings such as structure paint, wallpaper paste, suitable roller plaster and pasty fillers. The heavily felted polyamide continuous cover in medium pile length offers sufficient material absorption capacity with good fibre elasticity and stability. Compared to conventional plush rollers, the nylon coating roller has less tendency to stick and therefore ensures consistently uniform and high-quality coating results.

- Painting

### Nylon coating roller 18 cm

Item no. 84 30 26 97 | Pack of 10

- Roller plaster
- Structure paint
- Pasty fillers
- Paste

### Nylon coating roller 12 cm

Item no. 86 33 12 97 | Pack of 10

- Roller plaster
- Structure paint
- Pasty fillers
- Paste

## NYLON ROLLER FOR ROLLER PLASTER

The nylon roller for roller plaster has been specially developed for the application of roller plaster and fillers.

Extremely robust, wear-resistant yet flexible nylon loops ensure optimal and even material distribution. The plaster or filler application is thus up to 3x faster compared to application with conventional paint rollers or spatulas. Even downstream work steps such as smoothing and structuring are optimally prepared thanks to the uniform coat thickness.

- Coating
- Varnishing

### Nylon roller for roller plaster 18 cm

Item no. 84 20 19 97 | Pack of 5

- Roller plaster
- Structure paint
- Pasty fillers

## 03 PROFESSIONAL ACCESSORIES

**U**seful paint application accessories are essential on site. Ergonomics, efficiency and durability are paramount here. The professional accessories from COLOR EXPERT offer optimum solutions: Ergonomic 2-component handles and telescopic rods made of particularly light materials enable low-fatigue work, even in continuous use. Sophisticated details, such as the metal punching of the paint can opener for more efficient paint mixing, are the result of consistent product development oriented towards day-to-day professional life.

## Roller frame for 18 cm paint rollers

Item no. 84 05 18 99 | Pack of 10

- Ergonomic 2K handle
- 27 cm length
- Compatible with all available telescopic poles

8 mm

## Roller frame for 25 cm paint rollers

Item no. 84 05 25 99 | Pack of 10

- Ergonomic 2K handle
- 27 cm length
- Compatible with all available telescopic poles

8 mm

## Roller frame for 10 -15 cm paint rollers

Item no. 86 04 39 99 | Pack of 10

- Ergonomic 2K handle
- 37 cm length
- Compatible with all available telescopic poles

6 mm

## Paint tray XXL 34 x 50 cm

Item no. 84 80 30 10 | Pack of 5

- For large containers
- Structured rolling surface
- With pouring spout
- Extremely robust

## 03 PROFESSIONAL ACCESSORIES

### Aluminium-fibreglass telescopic extension pole

Item no. 84 96 22 97 | Pack of 6

- 114 - 200 cm length
- Large soft grip
- High stability, lightweight
- Standard cone

### XXL aluminium telescopic extension pole

Item no. 84 93 00 97 | Pack of 5

- 165 - 300 cm length
- High stability, lightweight
- Standard cone

### Storage box for paint rollers

Item no. 93 53 10 97 | Pack of 4

- For roller refills with 18 -27cm length
- Protects against drying out for up to 90 days
- Reusable
- Easy-to-clean design

## RELAXED BREAKS

No problem – thanks to the professional storage box. It protects used paint rollers from drying out – up to 90 days. It fits 18 -27cm paint rollers and thanks to the small recess, even complete rollers with handles are simple to attach.

The box is easy to clean and reusable.

## Stir stick 55 cm

Item no. 94 36 56 97 | Pack of 10

- For stirring large containers
- With slot for improved paint mixing

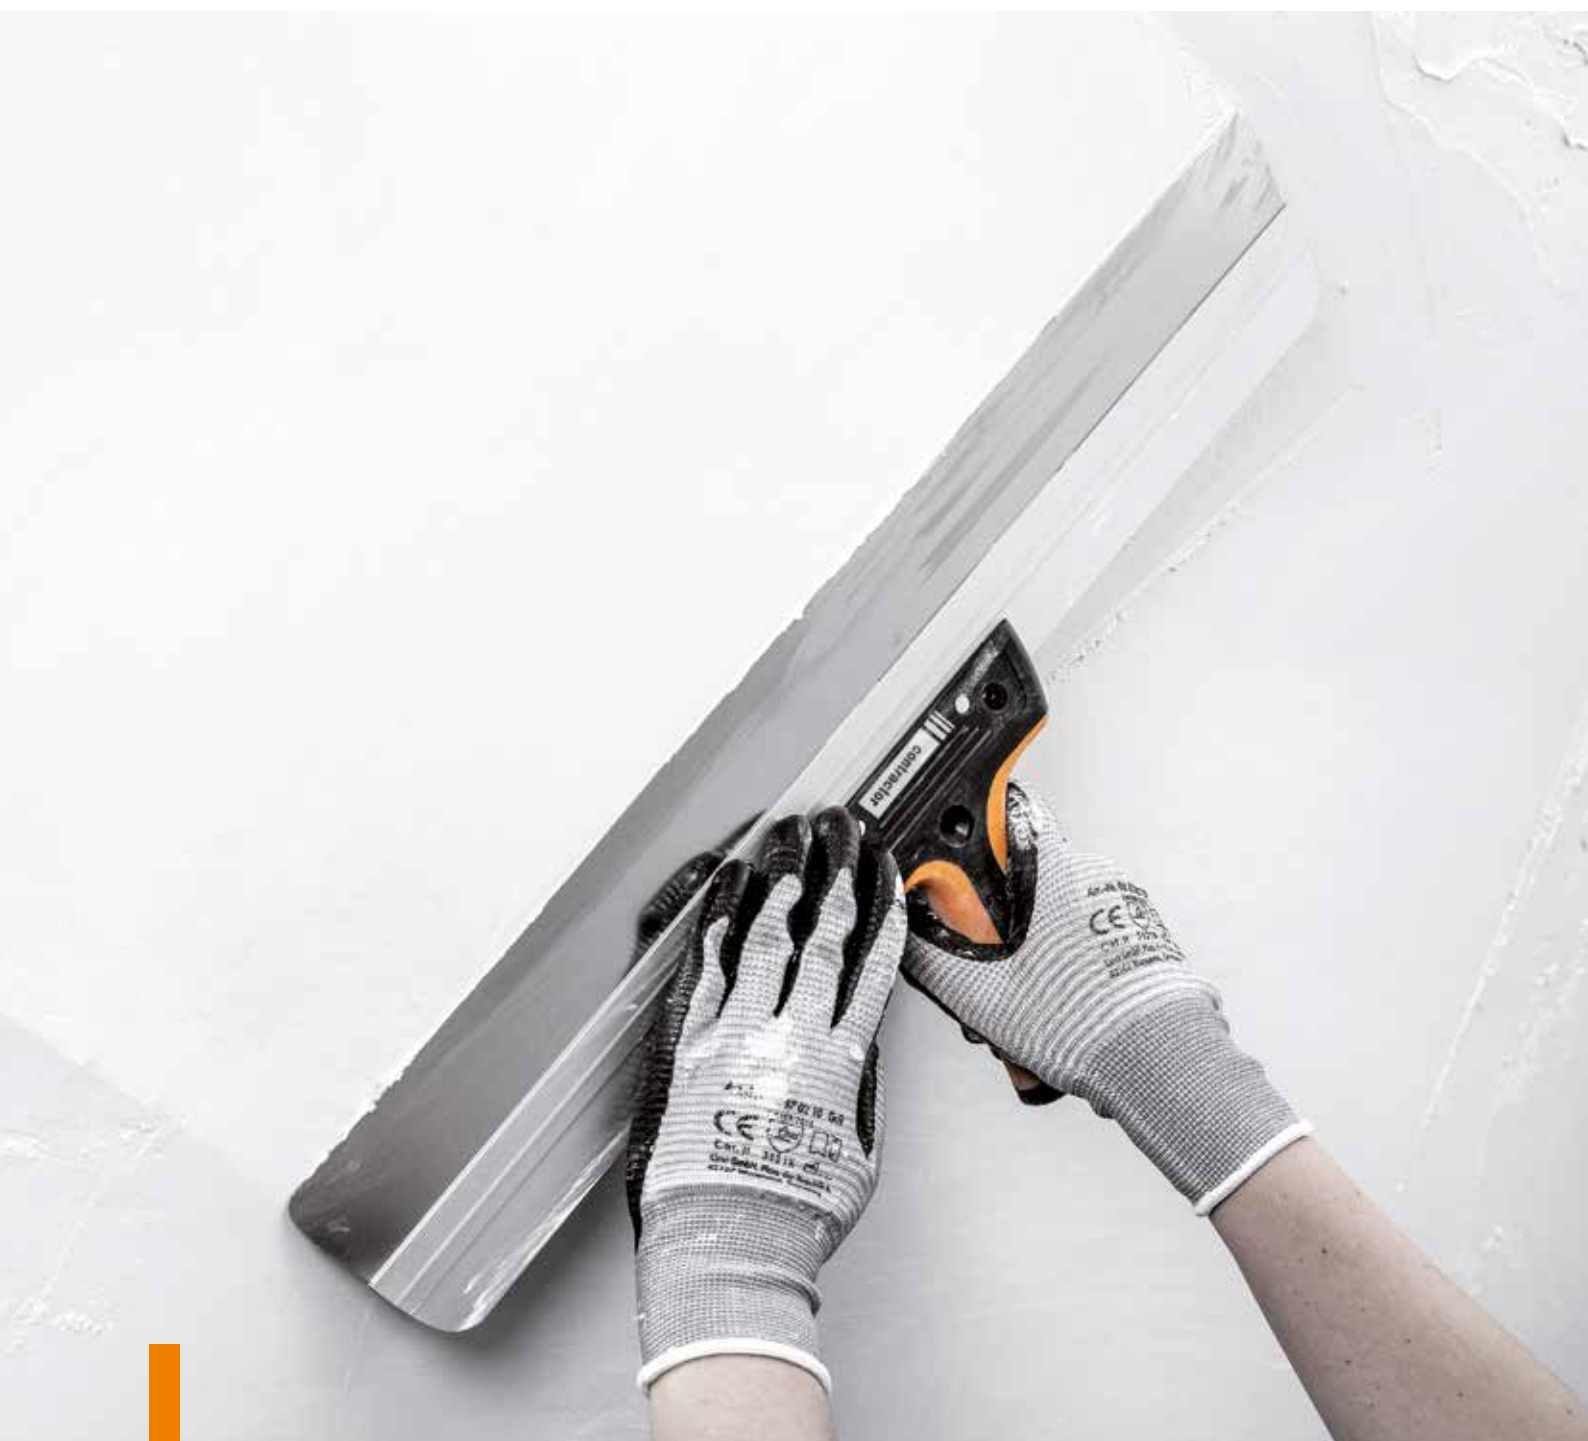

## Paint can opener 28 cm

Item no. 94 31 28 10 | Pack of 10

- For opening paint cans
- Also suitable as a stirring rod
- Made of metal

## 04 PROFESSIONAL TOOLS FOR CREATING SMOOTH SURFACES

**S**uper-smooth surfaces are becoming more important in room and wall design. Super-smooth, specially filled surfaces (Q3/Q4) are becoming more and more common where traditional wallpapers were used in the past. In addition to the basic and standard filling (Q1/Q2), more and more ambitious DIY enthusiasts are also daring to adopt this premier class of surface design. With the professional tools from COLOR EXPERT, craftsmen and demanding DIY enthusiasts can achieve perfectly smooth surfaces.

## Stiff paint scraper 50 mm

Item no. 91 51 50 97 | Pack of 3

- Rigid blade with cutting edge
- For removing old material
- With striking cap
- Ergonomic handle

## Multi-purpose scraper 75 mm

Item no. 91 51 75 97 | Pack of 3

- Rigid blade with cutting edge
- For a wide range of applications
- With striking cap
- Ergonomic handle

## OUR ALL-ROUNDER

The multifunctional scraper from COLOR EXPERT lives up to its name:

Thanks to the rigid stainless steel blade with cutting edge, pointed blade, various blade recesses and serrated edge, the scraper can be used for a wide range of applications: It is suitable for scraping old coverings, scraping out joints, cleaning paint rollers, as a nail puller, bottle opener and brush comb.

## Flexible paint scraper 75 mm

Item no. 91 50 75 97 | Pack of 3

- Flexible blade
- For filling and smoothing
- With striking cap
- Ergonomic handle

## 04 PROFESSIONAL TOOLS FOR CREATING SMOOTH SURFACES

### Drywall scraper 150 mm

Item no. 91 50 15 97 | Pack of 3

- Flexible blade
- For filling and smoothing drywalls
- With striking cap and PH2 bit
- Ergonomic handle

### Square scraper 160 mm

Item no. 91 02 16 10 | Pack of 5

- Flexible blade

## Plasterer's spatula 80 mm

Item no. 92 17 80 97 | Pack of 5

- For applying and structuring plasters and fillers
- 0.7 mm sheet thickness
- Ergonomic handle

## Drywall trowel 305 x 120 mm

Item no. 92 13 30 97 | Pack of 3

- Curved leaf shape
- Rounded leaf corners
- 0.7 mm sheet thickness
- Ergonomic handle

## BENT? THAT'S RIGHT!

The drywall trowel from COLOR EXPERT has been specially developed for grouting joints between plasterboard panels. It is characterised by its curved leaf shape, which ensures optimum material distribution and particularly flat filler transitions. This reduces the effort required for subsequent grinding processes.

**Important:** Apply the filler in the middle of the blade and apply it perpendicular to the joint.

## Special Venetian trowel 240 x 110 mm

Item no. 92 14 20 97 | Pack of 3

- For creative and special plastering techniques
- Radially ground blade edges
- 0.7 mm sheet thickness
- Ergonomic handle

## 04 PROFESSIONAL TOOLS FOR CREATING SMOOTH SURFACES

### Q4 spatula 280 x 110 mm

Item no. 92 13 20 97 | Pack of 3

- Ultra-flexible double blade
- Bevelled pages and rounded corners
- 0.3 mm sheet thickness
- Ergonomic handle

### ULTRA-THIN, ULTRA-FLEXIBLE

A spatula that lives up to its name:

With its extremely thin (0.3 mm) and ultra-flexible double blade, the Q4 trowel is the perfect tool for the highest quality plastering work. Thanks to the bevelled blade edges and rounded corners, the material can be applied and distributed without any filler burrs.

The optimal preparation for downstream work steps such as sanding, final filling, stripping and finishing.

### Drywall sanding set

Item no. 93 39 00 97 | Pack of 3

- Suction sander 228 x 82 mm
- Adapter piece suitable for many commercially available vacuum cleaners
- Sanding disc 3 x K80, 3 x K120, 3 x K180

## Aluminium façade putty knife 600 mm

Item no. 91 48 60 97 | Pack of 2

- For removing plaster and filler
- 0.3 mm sheet thickness
- Two-handed tool guide
- Large aluminium handle

## PERFECTLY SMOOTH SURFACES

After applying and distributing plasters or fillers, the material must be sanded down in order to achieve a uniform, flat surface. The aluminium putty knife from COLOR EXPERT relies entirely on ergonomics and professional work results. The large, super-lightweight aluminium handle enables low-fatigue, two-handed tool guidance. This creates a particularly flat contact angle of the flexible, rounded stainless steel blade, which even compensates for the finest unevenness.

## Façade scraper 250 mm

Item no. 91 34 25 97 | Pack of 5

- For removing plaster and filler
- 0.4 mm sheet thickness
- Rounded leaf corners
- Ergonomic handle

## Façade scraper 600 mm

Item no. 91 34 60 97 | Pack of 5

- For removing plaster and filler
- 0.4 mm sheet thickness
- Rounded leaf corners
- Ergonomic handle

## 04 PROFESSIONAL TOOLS FOR CREATING SMOOTH SURFACES

### Smoothing trowel 250 mm

Item no. 91 34 26 97 | Pack of 3

- For removing particularly fine fillers
- 4 mm rubber blade
- Super smooth surfaces
- Ergonomic handle

### SMOOTH. FOOLPROOF. GOOD.

COLOR EXPERT's smoothing trowel has been specially developed so that even ambitious DIY enthusiasts can remove filled surfaces super smoothly. What is otherwise only mastered by professionals with good tools and vast experience can now also be mastered by DIYers. The flexible, one-sided rounded rubber blade ensures optimum pressure distribution, which on the one hand allows the material to be smoothed well and on the other hand reduces the risk of filler burrs. Compared to metal blades, the material does not attract as much, which ensures a permanently pleasant finish, easy cleaning and high durability.

### Wallpapering wiper 300 x 25 mm

Item no. 95 89 17 97 | Pack of 12

- Ideal for embedding painter's fleece
- High-quality China bristles, vulcanised
- Large natural wooden handle

## 05 PROFESSIONAL TOOLS

**T**hey are not there for paint application or filling the wall, but they are just as important for the craftsman's everyday life: whether for personal protection, for cleanliness on the job site or simply as a handy companion for cutting material or opening packaging. Professional tools from COLOR EXPERT offer optimum support for a wide range of renovation work.

## Snap-off knife 18 mm

Item no. 95 65 80 97 | Pack of 6

- Black blade with optimised sharpening technique
- Extreme cutting sharpness
- Automatic blade lock
- Robust die-cast aluminium housing

## THE BLACK BLADE – EXTRA SHARP

Snap-off blades have to fulfil various tasks in the daily work of tradesmen: cutting wallpaper and fleece, foils and adhesive tapes, opening various packaging. It is important that they are reliable and durable. The snap-off blades with special black coating and optimised special sharpening are characterised by extreme cutting sharpness and an increased service life. They cut even in demanding jobs – reliably and consistently.

## Snap-off blades 18 mm

Item no. 95 68 18 97 | Pack of 10 | Quantity: 10

- Black blade with optimised sharpening technique
- Extreme cutting sharpness
- Long service life
- In safety dispenser

# 05 PROFESSIONAL TOOLS

## Gloves size 8

Item no. 98 54 01 10 | Pack of 12

- Good tactile sensitivity
- PU material
- Silicone free
- Complies with CE Cat I, EN 420

## Gloves size 9

Item no. 98 54 02 10 | Pack of 12

- Good tactile sensitivity
- PU material
- Silicone free
- Complies with CE Cat I, EN 420

## Foil door 2.20 x 1.20 m

Item no. 96 96 22 15 | Pack of 5

- Protects against dust and odours during renovation work
