# Our philosophy

## „There is a PRO in everyone!”

### End user orientation

COLOR EXPERT knows the needs of the end user in terms of painting tools - and develops products, based on these needs. Our end-user studies show: They expect a high-quality result; It is important that the products are attractive and harmless for both humans and nature. They expect to be quickly informed at the POS system and guided to the right product. We consistently orient ourselves towards these requirements of end users - with our products and presentations.

### Product innovations

We constantly developing our painting tools. The decisive factor is: to provide a work result like a professional. We are in permanent discussions with professional painters and the paint industry. Our products are always tailored to the current status of paints and applications. We also attach great importance to modern and ergonomic design and high-quality materials during our product developments.

### Sustainability

We use consistent tested materials for production of our painting tools. They provide the base for high quality and guarantee contaminant-free, harmless products, which meet all legal and customer-specific requirements. From handles to paint grids or roller covers, we pay attention to sustainable production. We manufacture our brush handles from FSC®-certified woods, as part of our responsibility for nature and consumer.

### Manufacturing competence

With our own production facilities and more than 125 years of experience, we present the highest level of competence in the development and manufacture of painting tools. Our paint roller production is the largest in Europe. All our production processes are subject to strict quality controls and continuous improvement processes. This is how we guarantee consistently a high level of quality.

Sign of responsible  
forest management

Our FSC® certified  
products are simple to  
identify by this logo.

# Efficiency

## Painting tools - like a professional

During development of our products and conception of our assortments, we consistently focus on the needs of our customers - our partners in retail as well as the end-users. We are in close contact with the paint industry, our raw material suppliers – e.g., filament manufacturers - and professional painters. Latest findings from the paint industry as well as the experiences of professional users flow directly into our product development. Therefore, the end users work with our painting tools like from the professional.

## Own production facilities

We produce in our own production facilities. Our paint roller production in Pelhřimov (CZ) is the largest in Europe. The automatic production systems are state-of-the-art and enable us to produce efficiently.

## State-of-the-art production processes

We manufacture paint rollers for all requirements and applications with the most modern production methods. Our extrusion machines produce 12.75 million meters of inner tubes for rollers every year. Our brush manufacturing line ensures maximum efficiency. Also, the plastic components and plastic products are produced fully in our multi-component full automatized plastic injection molding machines. Permanent quality controls guarantee a constant high level of quality.

## Reliable delivery times

With our logistic and sales locations across Europe and Asia, we are always close to our customers. We operate logistic centers all over Europe: from Latvia to Spain, from Great Britain to Russia. In this way we ensure the highest quality of supplies and short delivery times.

## Storch-Ciret Group in numbers

Employees	approx. 1.400
Production and warehouse area	40.000 qm

- Beijing, China
- Zhejiang, China

# Unique display concept

## Intuitive consumer guidance. Safe decision.

Optimal customer guidance = satisfied customers. Tests showed: safely guided consumers buy up to 15% more, and higher quality products. COLOR EXPERT ensures that the end customers can easily orientate themselves in the store and can make their decisions quickly. The POS concept guides everybody easily from the pre-defined application fields through the specific applications to the right product.

## Quick orientation. Optimal presentation.

Safe guidance of end user is continued in product design and on the packaging. Easily understandable pictograms and modern icons provide intuitive information about possible applications and product features. The end users will quickly find exactly what they need to achieve perfect work results.

## Less costs. High profitability.

Our intuitive customer guidance and POS information materials relieves the sales force. The customers find the right product on the shelf themselves. Your work force needs = costs are reduced - and customer satisfaction is increased at the same time.

## The colour coding system from COLOR EXPERT

The color coding system from COLOR EXPERT assigns clearly defined colors to different working areas. The colors are based on our natural, familiar color spectrum: purple, blue, green, yellow and red. The respective area of application is properly identified and signed by color coding. Application pictograms in corresponding colors support the structuring of different application areas in respective working steps.

# The function of the POS elements

*There is a pro in everyone.*

The closer the end user gets to the product, the greater knowledge he obtains. The targeted placement of related items strengthen cross-selling effects.

## Head displays

The colour, text and key visuals on head displays identify the respective product area.

## Vertical banner

Colour-coded vertical banners lead end users to respective application field even in narrow aisles. They also draw attention to high-quality products. This improves the overall result - for end user and retailer.

## Horizontal banner

Horizontal banners structure the assortment of the respective working steps. The products are divided into reasonable product segments. In this way, you safely guide the end customers to the right segment.

### PowerMaster

- Spritzlöslösung für alle Oberflächen
- 200 ml Spritzlöslösung für 20 m<sup>2</sup> Fläche
- Hochdruckwasser für alle Oberflächen

### UltraLight

- Leichtes Gewicht für alle Oberflächen
- 200 ml Spritzlöslösung für 20 m<sup>2</sup> Fläche
- Hochdruckwasser für alle Oberflächen

- XpertErgo
- XpertFinish
- XpertSpeed
- XpertPlanet

## Wände streichen

# Wände streichen

# Safe to make a purchase decision

With COLOR EXPERT, the end user is safely guided on his way to right purchase decisions - and fully supported on his project with appropriate painting tools.

## 1. The range

- Thanks to vertical banners, the application field is clearly visible from faraway distance, even in narrow aisles.
- The clear assignment of paints and application field clearly shows to the end customer: here I am right.
- Head displays confirm the application fields on each module.
- The key visual is the end user's identification figure. He recognizes himself in it.

## 2. The surface

- Horizontal banners guide our end user to the right painting tools for his/her respective surface (smooth, rough, coarse).
- Live sample of surface pattern and the corresponding roller gives him/her a certainty at choosing the tool.
- The end user is properly advised - without further advice needs.

## 3. The quality

- Better-Best Icons guide the end user to right choice of a product quality.
- The arrangement of different qualities follows the usual HPP, MPP, OPP direction from top to bottom.

# The modules „Painting walls and facades”

## Painting walls

The end user knows exactly what he is up to: painting walls. The head panel leads him to the right shelf.

## Immediately in the right segment

Based on the surface & better-best icons on the displays, the customer can easily find the tool he needs - in the quality he wants.

## Easy choice

Which roller to use on which surface? With the horizontal banner, the end user will be properly guided to the right painting tools according to his respective surface (smooth, rough, coarse). He will get important information to make the right decisions when buying. Samples of Surface patterns and roller samples help the choice of the optimal tool.

## Properly sorted. Optimal guided.

The different tools in the field "Painting walls" are in the three modules clearly sorted: from brushes and rollers to handles and paint trays. Surface patterns on the baskets make the choice of rollers easier. Live samples of rollers, placed in front of the roller baskets allows customers to touch & feel the product before buying it.

# The module „Varnishing”

## Varnishing

Knowing where: Thanks to our colour-coding system, the end user knows immediately where to find the tool for her/his varnishing job.

## Immediately in the right segment

Smooth or rough surface? And what quality? Using the information about different surface and the Better-Best icons on the panels, end customer can easily find the proper tool he needs.

## Simple solution: the 2 in 1 principle

The end user wants simple solutions. COLOR EXPERT offers it: with universal tools that are just as suitable for solvent-based paints as for water-based paints. Will this roller be working with my paint? Can I use this paint brush again even though I don't know anymore which paint I bought it for? End customer neither wants to nor has to deal with such questions - thanks to our 2 in 1 concept from COLOR EXPERT.

## The highlights

Great surface results thanks to our unique products UniStar and EvoStar: The vertical divider draws the customer's attention to special products at POS: End customer is encouraged to choose the high-quality products.

# The module „Wood staining”

## Wood Staining

Looking for a tool for wood preserving? The head display confirms by glance to your customer that the customer is in the right spot.

### Smooth or profiled wood?

Woodstain tools for different types of wood, each in better and best quality. Information on the panels immediately give the answers.

## The highlights

The WoodStar is a multiple award-winning woodstain brush. The narrow vertical divider draws the customer's attention to top product at POS - without taking up space in the aisle.

# The modules „Fixing, sanding and paper hanging”

## A module for each working step

Sanding, paper hanging or fixing: the head displays show your customer in which module he can find the appropriate tool.

## Immediately in the right segment

The panels are separated according to different product areas. Tools for filling applications are shown separately.

## The highlights

The best way to present top products for various working steps is also to be using vertical dividers. Eye-catchers that attracts one without getting in the way.

# The modules „Masking and covering”

## A module for every work step

One module for fleece and foils, one module for adhesive tapes. Head panels offer the best orientation.

## Immediately in the right segment

The banners in the shelves ensure horizontal orientation and separate the wide assortment of whole masking into the different product groups.

## Quickly informed, certainly decide

Which surface? Inside or outside? For days or weeks? With a help of our navigator system on the vertical bannner, your customer can find out quickly and easily which masking product is the best suitable for his planned application.

# Xpert icons

## Showing what you can do: Xpert icons

Ergonomically optimized handling, perfect surface results, fast work, sustainable product - our "Xpert icons" enable the end user to constantly check what differentiates various products.

**XpertErgo**

**XpertErgo** stands for perfect handling. The ergonomic shape of the tool is optimally adapted to the user. He can work gently to his hands and without getting tired soon.

**XpertSpeed**

**XpertSpeed** stands for high working speed. Such tools enable the user to work quickly and easily.

**XpertFinish**

**XpertFinish** stands for a perfect working result. Tools with this icon enable an excellent surface finish.

**XpertPlanet**

**XpertPlanet** stands for sustainable products. For example, we use wood only from sustainable forest industry.

# Masking Covering Fixing

# Fixing Sanding Wallpapering

# SandMaster

## Hand sander with Ergo-knob

- robust plastic clips for simple fixing of sanding paper
- optimal sanding results also on profiled surfaces
- wide, ergonomic knob handle for ideal power transfer
- stable reinforced plastic for long service life

### Ergonomic knob handle

The ergonomic knob provides fatigue free sanding also at use of higher pressing force

### Simple fixing

The sturdy and robust plastic clips fix the wet & dry sanding paper especially simple and steady.

SandMaster	Measures

## Wallpapering tool

1

### Wallpaper/floor scraper

- steel blade
- handle length: 290 mm
- ergonomic 3 component soft touch handle
- optimal for removing of old wallpapers, plaster residues on floor etc.

Art.No.	Width	Label	PU
93 72 80 99	100 mm	CE	3

2

### Wallpaper /floor scraper

- steel blade
- handle length: 300 mm
- plastic handle
- optimal for removing of old wallpapers, plaster residues on floor etc.

Art.No.	Width	Label	PU
93 72 83 99	100 mm	CE	5

3

### Spare blades for wallpaper scraper

- to use with wallpaper / floor scraper
- suitable for Art.No. 93728099 and 93728399

Art.No.	Width	Label	PU
93 72 82 99	100 mm	CE	6

4

### Wallpaper smoother pro

- flexible plastic
- thick & convenient handle

Art.No.	Width	Label	PU
95 88 10 99	28 cm	CE	12

5

### Wallpaper smoother

- flexible, plastic

Art.No.	Width	Label	PU
95 88 00 10	28 cm	EAN	5

6

### Wallpaper brush

- PP synthetic bristles
- natural wooden handle
- useful at all wallpaper hanging works

Art.No.	Dimension	Label	PU
95 89 00 10	300x25 mm	EAN	4

**1**

## Seam roller

- cylindric PU foam roller
- ergonomic 3 component soft touch handle
- optimal for fixing of wallpapers

Art.No.	Width	Diameter	Label	PU
95 87 50 99	45 mm	35 mm	CE	5
95 87 00 99	150 mm	45 mm	CE	5

## Chalk line reel set

- 3pcs set
- plastic body
- including a bottle (115 g) of blue chalk line powder, mini spirit level

Art.No.	Label	PU
98 35 30 99	CE	10

**3**

## Chalk line powder

- powder color: blue
- 180 g

Art.No.	Label	PU
98 35 05 10	EAN	10

**4**

## Carpenter's pencil set

- 3pcs set
- ideal for DIY and professionals at working

Art.No.	Label	PU
98 20 03 10	EAN	10

There is a pro in everyone.

1

## Wallpaper scissor

- extra long stainless steel blades
- ergonomic 2 component plastic handles

Art.No.	Width	Label	PU
95 84 50 99	28 cm	CE	6

2

## Snap-off cutter - Extra Wide

- ergonomic 2 component soft touch plastic body
- metal guide
- extra strong manual blade fixing with screw knob
- extra wide, 25mm blade

Art.No.	Width	Label	PU
95 64 00 10	25 mm	EAN	6

3

## Snap-off cutter

- aluminium alloy body
- metal guide
- automatic blade fixing

Art.No.	Width	Label	PU
95 65 20 99	18 mm	CE	10
95 65 20 10	18 mm	EAN	24

# WoodStar

## The long distance professional for all kinds of wood stains

- Up to 30% more coverage thanks to the integrated paint tank
- Patented in-house production, manufactured for the professional market
- New bristle arrangement - for an exclusive coating result

*There is a pro in everyone.*

### Synthetic bristle mixture

High-tech bristles for a first-class finish and long service life

**PLUS  
30 %  
coverage**

### Paint tank made from natural bristle mixture

30% higher coverage than comparable products

### FSC®-certified wooden handle

Comfortable handling thanks to the sweat-absorbing wooden surface. The wooden handles come from sustainable forestry

### Stainless steel ferrule

Increased service life thanks to the stainless components

## The varnishing roller for the perfect surface finish

- Specially refined polyester foam
- Concave sides\*
- Easy and streak-less painting
- Suitable for all varnishes
- From own production for highest quality standards

### Refined special foam

- Guarantees a fine finish
- Increased paint load
- Homogenous paint release

### Concave roller sides

- Less pressure on the surface
- No streaks or rolling marks
- Precise paint borders in the corner
- Larger working width compared to conventional rounded refills

### All varnishes

For water-based and solvent-based varnishes

*There is a pro in everyone.*

# ComfortStar

## Suitable for all painting, wood staining and varnishing works

- Robust design in professional quality
- With nub structure for optimal paint load
- Easy and quick work

### Measuring scale

Preset measuring lines enable precise dosage of paint

### Specially shaped pouring spout

Allows an easy and clean pouring out of excessive paint

### Raised rim height

Prevents spattering and dripping at rolling of paint roller in the tray

*There is a pro in everyone.*

### Extra stability

With the further developed new product shape we achieved a higher torsional rigidity, making the tray more stabile.

### Structured paint reservoir

The ribbed structure in the paint reservoir prevents the roller from slipping through and increases paint load

### Structured rolling surface

The nubby structure in the rolling surface ensures optimal paint load and homogenous painting results

### Optimized hanging hole

For DIY-friendly hanging in the POS wall and for hanging storage by the end user

## Plaster & "Rollputz" roller

- special foam with coarse structure
- for effective applying and structuring of plasters

Art.No.	Width	Label	PU
85 88 18 99	18 cm	CE	5

# PowerMaster

## The "knick" brake makes the difference!

- Optimized roller pressure
- Perfect guidance with minimal effort
- Fast work
- Very good painting result

### New roller handle wire geometry

For an optimal application angle at painting

*There is a pro in everyone.*

### New roller handle PowerMaster

- New wire geometry
- Made of high-quality galvanized steel
- 3-component handle with integrated thumb rest
- Suitable for all telescopic poles

### 3-component handle with integrated thumb rest

Developed according to ergonomic principles
